joshua bassett website: America's Urban Crisis and the Advent of Color-Blind Politics

Curtis L. Ivery, Joshua Bassett, 2011-09-16 Over 40 years ago the historic Kerner Commission Report declared that America was undergoing an urban crisis whose effects were disproportionately felt by underclass populations. In *America's Urban Crisis and the Advent of Color-blind Politics*, Curtis Ivery and Joshua Bassett explore the persistence of this crisis today, despite public beliefs that America has become a post-racial nation after the election of Barack Obama to the presidency. Ivery and Bassett combine their own experience in the fields of civil rights and education with the knowledge of more than 20 experts in the field of urban studies to provide an accessible overview of the theories of the urban underclass and how they affect America's urban crisis. This engaging look into the still-present racial politics in America's cities adds significantly to the existing scholarship on the urban underclass by discussing the role of the prison-industrial complex in sustaining the urban crisis as well as the importance of the concept of multiracial democracy to the future of American politics and society. *America's Urban Crisis and the Advent of Color-blind Politics* encourages the reader not only to be aware of persisting racial inequalities, but to actively engage in efforts to respond to them.

joshua bassett website: The Ecology of Human Development Urie BRONFENBRENNER,

2009-06-30 Here is a book that challenges the very basis of the way psychologists have studied child development. According to Urie Bronfenbrenner, one of the world's foremost developmental psychologists, laboratory studies of the child's behavior sacrifice too much in order to gain experimental control and analytic rigor. Laboratory observations, he argues, too often lead to the science of the strange behavior of children in strange situations with strange adults for the briefest possible periods of time. To understand the way children actually develop, Bronfenbrenner believes that it will be necessary to observe their behavior in natural settings, while they are interacting with familiar adults over prolonged periods of time. This book offers an important blueprint for constructing such a new and ecologically valid psychology of development. The blueprint includes a complete conceptual framework for analysing the layers of the environment that have a formative influence on the child. This framework is applied to a variety of settings in which children commonly develop, ranging from the pediatric ward to daycare, school, and various family configurations. The result is a rich set of hypotheses about the developmental consequences of various types of environments. Where current research bears on these hypotheses, Bronfenbrenner marshals the data to show how an ecological theory can be tested. Where no relevant data exist, he suggests new and interesting ecological experiments that might be undertaken to resolve current unknowns. Bronfenbrenner's groundbreaking program for reform in developmental psychology is certain to be controversial. His argument flies in the face of standard psychological procedures and challenges psychology to become more relevant to the ways in which children actually develop. It is a challenge psychology can ill-afford to ignore.

joshua bassett website: Being Property Once Myself Joshua Bennett, 2020-05-12 Winner of the

William Sanders Scarborough Prize "This trenchant work of literary criticism examines the complex ways...African American authors have written about animals. In Bennett's analysis, Richard Wright, Toni Morrison, Jesmyn Ward, and others subvert the racist comparisons that have 'been used against them as a tool of derision and denigration.'...An intense and illuminating reevaluation of black literature and Western thought." —Ron Charles, Washington Post For much of American history, Black people have been conceived and legally defined as nonpersons, a subgenre of the human. In *Being Property Once Myself*, prize-winning poet Joshua Bennett shows that Blackness has long acted as the caesura between human and nonhuman and delves into the literary imagination and ethical concerns that have emerged from this experience. Each chapter tracks a specific animal—the rat, the cock, the mule, the dog, the shark—in the works of Richard Wright, Toni Morrison, Zora Neale Hurston, Jesmyn Ward, and Robert Hayden. The plantation, the wilderness,

the kitchenette overrun with pests, the valuation and sale of animals and enslaved people—all place Black and animal life in fraught proximity. Bennett suggests that animals are deployed to assert a theory of Black sociality and to combat dominant claims about the limits of personhood. And he turns to the Black radical tradition to challenge the pervasiveness of anti-Blackness in discourses surrounding the environment and animals. *Being Property Once Myself* is an incisive work of literary criticism and a groundbreaking articulation of undertheorized notions of dehumanization and the Anthropocene. “A gripping work...Bennett’s lyrical lilt in his sharp analyses makes for a thorough yet accessible read.” —LSE Review of Books “These absorbing, deeply moving pages bring to life a newly reclaimed ethics.” —Colin Dayan, author of *The Law Is a White Dog* “Tremendously illuminating...Refreshing and field-defining.” —Salamishah Tillet, author of *Sites of Slavery*

joshua bassett website: [Ugly Feelings](#) Sianne Ngai, 2009-07-01 Envy, irritation, paranoia—in contrast to powerful and dynamic negative emotions like anger, these non-cathartic states of feeling are associated with situations in which action is blocked or suspended. In her examination of the cultural forms to which these affects give rise, Sianne Ngai suggests that these minor and more politically ambiguous feelings become all the more suited for diagnosing the character of late modernity. Along with her inquiry into the aesthetics of unprestigious negative affects such as irritation, envy, and disgust, Ngai examines a racialized affect called “animatedness,” and a paradoxical synthesis of shock and boredom called “stuplimity.” She explores the politically equivocal work of these affective concepts in the cultural contexts where they seem most at stake, from academic feminist debates to the Harlem Renaissance, from late-twentieth-century American poetry to Hollywood film and network television. Through readings of Herman Melville, Nella Larsen, Sigmund Freud, Alfred Hitchcock, Gertrude Stein, Ralph Ellison, John Yau, and Bruce Andrews, among others, Ngai shows how art turns to ugly feelings as a site for interrogating its own suspended agency in the affirmative culture of a market society, where art is tolerated as essentially unthreatening. Ngai mobilizes the aesthetics of ugly feelings to investigate not only ideological and representational dilemmas in literature—with a particular focus on those inflected by gender and race—but also blind spots in contemporary literary and cultural criticism. Her work maps a major intersection of literary studies, media and cultural studies, feminist studies, and aesthetic theory.

joshua bassett website: The Road of Excess Marcus Boon, 2005-03-15 From the antiquity of Homer to yesterday's Naked Lunch, writers have found inspiration, and readers have lost themselves, in a world of the imagination tinged and oftentimes transformed by drugs. The age-old association of literature and drugs receives its first comprehensive treatment in this far-reaching work. Drawing on history, science, biography, literary analysis, and ethnography, Marcus Boon shows that the concept of drugs is fundamentally interdisciplinary, and reveals how different sets of connections between disciplines configure each drug's unique history. In chapters on opiates, anesthetics, cannabis, stimulants, and psychedelics, Boon traces the history of the relationship between writers and specific drugs, and between these drugs and literary and philosophical traditions. With reference to the usual suspects from De Quincey to Freud to Irvine Welsh and with revelations about others such as Milton, Voltaire, Thoreau, and Sartre, *The Road of Excess* provides a novel and persuasive characterization of the effects of each class of drug—linking narcotic addiction to Gnostic spirituality, stimulant use to writing machines, anesthesia to transcendental philosophy, and psychedelics to the problem of the imaginary itself. Creating a vast network of texts, personalities, and chemicals, the book reveals the ways in which minute shifts among these elements have resulted in drugs and literature as we conceive of them today.

joshua bassett website: Mothers and Others Sarah Blaffer Hrdy, 2011-04-15 Somewhere in Africa, more than a million years ago, a line of apes began to rear their young differently than their Great Ape ancestors. From this new form of care came new ways of engaging and understanding each other. How such singular human capacities evolved, and how they have kept us alive for thousands of generations, is the mystery revealed in this bold and wide-ranging new vision of human emotional evolution. *Mothers and Others* finds the key in the primatologically unique length of human childhood. If the young were to survive in a world of scarce food, they needed to be cared for, not only by their mothers but also by siblings, aunts, fathers, friends—and, with any luck, grandmothers. Out of this complicated and contingent form of childrearing, Sarah Hrdy argues, came the human capacity for understanding others. Mothers and others teach us who will care, and who will not. From its opening vision of “apes on a plane”; to descriptions of baby care among marmosets, chimpanzees, wolves, and lions; to explanations about why men in hunter-gatherer societies hunt together, *Mothers and Others* is compellingly readable. But it is also an intricately knit argument that ever since the Pleistocene, it has taken a village to raise children—and how that gave our ancient ancestors the first push on the path toward becoming emotionally modern human beings.

joshua bassett website: The Color of Money Mehrsa Baradaran, 2017-09-14 “Read this book. It explains so much about the moment...Beautiful, heartbreaking work.” —Ta-Nehisi Coates “A deep accounting of how America got to a point where a median white family has 13 times more wealth than the median black family.” —The Atlantic “Extraordinary...Baradaran focuses on a part of the American story that’s often ignored: the way African Americans were locked out of the financial engines that create wealth in America.” —Ezra Klein When the Emancipation Proclamation was signed in 1863, the black community owned less than 1 percent of the total wealth in America. More than 150 years later, that number has barely budged. *The Color of Money* seeks to explain the stubborn persistence of this racial wealth gap by focusing on the generators of wealth in the black community: black banks. With the civil rights movement in full swing, President Nixon promoted “black capitalism,” a plan to support black banks and minority-owned businesses. But the catch-22 of black banking is that the very institutions needed to help communities escape the deep poverty

caused by discrimination and segregation inevitably became victims of that same poverty. In this timely and eye-opening account, Baradaran challenges the long-standing belief that black communities could ever really hope to accumulate wealth in a segregated economy. "Black capitalism has not improved the economic lives of black people, and Baradaran deftly explains the reasons why." —Los Angeles Review of Books "A must read for anyone interested in closing America's racial wealth gap." —Black Perspectives

joshua bassett website: *Law's Abnegation* Adrian Vermeule, 2016-11-14 Ronald Dworkin once imagined law as an empire and judges as its princes. But over time, the arc of law has bent steadily toward deference to the administrative state. Adrian Vermeule argues that law has freely abandoned its imperial pretensions, and has done so for internal legal reasons. In area after area, judges and lawyers, working out the logical implications of legal principles, have come to believe that administrators should be granted broad leeway to set policy, determine facts, interpret ambiguous statutes, and even define the boundaries of their own jurisdiction. Agencies have greater democratic legitimacy and technical competence to confront many issues than lawyers and judges do. And as the questions confronting the state involving climate change, terrorism, and biotechnology (to name a few) have become ever more complex, legal logic increasingly indicates that abnegation is the wisest course of action. As *Law's Abnegation* makes clear, the state did not shove law out of the way. The judiciary voluntarily relegated itself to the margins of power. The last and greatest triumph of legalism was to depose itself.

joshua bassett website: *From Head Shops to Whole Foods* Joshua C. Davis, 2017-08-08 In the 1960s and '70s, a diverse range of storefronts—including head shops, African American bookstores, feminist businesses, and organic grocers—brought the work of the New Left, Black Power, feminism, environmentalism, and other movements into the marketplace. Through shared ownership, limited growth, and democratic workplaces, these activist entrepreneurs offered alternatives to conventional profit-driven corporate business models. By the middle of the 1970s, thousands of these enterprises operated across the United States—but only a handful survive today. Some, such as Whole Foods Market, have abandoned their quest for collective political change in favor of maximizing profits. Vividly portraying the struggles, successes, and sacrifices of these unlikely entrepreneurs, *From Head Shops to Whole Foods* writes a new history of social movements and capitalism by showing how activists embraced small businesses in a way few historians have considered. The book challenges the widespread but mistaken idea that activism and political dissent are inherently antithetical to participation in the marketplace. Joshua Clark Davis uncovers the historical roots of contemporary interest in ethical consumption, social enterprise, buying local, and mission-driven business, while also showing how today's companies have adopted the language—but not often the mission—of liberation and social change.

joshua bassett website: *The Ordeal of Equality* David K. Cohen, Susan L. Moffitt, 2010-02-28 American schools have always been locally created and controlled. But ever since the Title I program in 1965 appropriated nearly one billion dollars for public schools, federal money and programs have been influencing every school in America. What has been accomplished in this extraordinary assertion of federal influence? What hasn't? Why not? With incisive clarity and wit, David Cohen and Susan Moffitt argue that enormous gaps existed between policies and programs, and the real-world practices that they attempted to change. Learning and teaching are complicated and mysterious. So the means to achieve admirable goals are uncertain, and difficult to develop and sustain, particularly when teachers get little help to cope with the blizzard of new programs, new slogans, new tests, and new rules. Ironically, as the authors observe, the least experienced and least well-trained teachers are often in the most needy schools, so federal support is compromised by the inequality it is intended to ameliorate. If new policies and programs don't include means to create the capability they require, they cannot succeed. We don't know what we need to enable states, school systems, schools, teachers, and students to use the resources that programs offer. The trouble with standards-based reform is that standards and tests still don't teach you how to teach.

Graetz, Ian Shapiro, 2020-02-18 "Deep, informed, and reeks of common sense." —Norman Ornstein "It is now beyond debate that rising inequality is not only leaving millions of Americans living on a sharp edge but also is threatening our democracy...For activists and scholars alike who are struggling to create a more equitable society, this is an essential read." —David Gergen We are in an age of crisis. That much we can agree on. But a crisis of what, exactly? And how do we get out of it? In a follow up to their influential and much debated *Death by a Thousand Cuts*, Michael Graetz and Ian Shapiro focus on what really worries people: not what the rich are making or the government is taking from them but their own insecurity. Americans are worried about losing their jobs, their status, and the safety of

their communities. They fear the wolf at the door. The solution is not protectionism or class warfare but better jobs, higher wages, greater protection for families suffering from unemployment, better health insurance, and higher quality childcare. And it turns out those goals are more achievable than you might think. *The Wolf at the Door* is one of those rare books that doesn't just diagnose our problems, it shows how to address them. "This is a terrific book, original, erudite, and superbly well-informed, and full of new wisdom about what might and what might not help the majority of Americans who have not shared in our growing prosperity, but are left facing the wolf at the door...Everyone interested in public policy should read this book." —Angus Deaton, Princeton University "Graetz and Shapiro wrestle with a fundamental question of our day: How do we address a system that makes too many Americans anxious that economic security is slipping out of reach? Their cogent call for sensible and achievable policies...should be read by progressives and conservatives alike." —Jacob J. Lew, former Secretary of the Treasury

joshua bassett website: *Midnight Rising* Tony Horwitz, 2011-10-25 A New York Times Notable Book for 2011 A Library Journal Top Ten Best Books of 2011 A Boston Globe Best Nonfiction Book of 2011 Bestselling author Tony Horwitz tells the electrifying tale of the daring insurrection that put America on the path to bloody war Plotted in secret, launched in the dark, John Brown's raid on Harpers Ferry was a pivotal moment in U.S. history. But few Americans know the true story of the men and women who launched a desperate strike at the slaveholding South. Now, *Midnight Rising* portrays Brown's uprising in vivid color, revealing a country on the brink of explosive conflict. Brown, the descendant of New England Puritans, saw slavery as a sin against America's founding principles. Unlike most abolitionists, he was willing to take up arms, and in 1859 he prepared for battle at a hideout in Maryland, joined by his teenage daughter, three of his sons, and a guerrilla band that included former slaves and a dashing spy. On October 17, the raiders seized Harpers Ferry, stunning the nation and prompting a counterattack led by Robert E. Lee. After Brown's capture, his defiant eloquence galvanized the North and appalled the South, which considered Brown a terrorist. The raid also helped elect Abraham Lincoln, who later began to fulfill Brown's dream with the Emancipation Proclamation, a measure he called a John Brown raid, on a gigantic scale. Tony Horwitz's riveting book travels antebellum America to deliver both a taut historical drama and a telling portrait of a nation divided—a time that still resonates in ours.

joshua bassett website: *The Neocortex* Wolf Singer, Terrence J. Sejnowski, Pasko Rakic, 2019-10-29 Experts review the latest research on the neocortex and consider potential directions for future research. Over the past decade, technological advances have dramatically increased information on the structural and functional organization of the brain, especially the cerebral cortex. This explosion of data has radically expanded our ability to characterize neural circuits and intervene at increasingly higher resolutions, but it is unclear how this has informed our understanding of underlying mechanisms and processes. In search of a conceptual framework to guide future research, leading researchers address in this volume the evolution and ontogenetic development of cortical structures, the cortical connectome, and functional properties of neuronal circuits and populations. They explore what constitutes "uniquely human" mental capacities and whether neural solutions and computations can be shared across species or repurposed for potentially uniquely human capacities. joshua bassett website: *Ancestors, Virgins, & Friars* Eugenio Menegon, 2009 In the sixteenth century, European missionaries brought a foreign and global religion to China. Converts then transformed this new religion into a local one. Focusing on the still-active Catholic communities of Fuan county in northeast Fujian, this project addresses three main questions. Why did people convert? Second, how did converts and missionaries transform a global and foreign religion into a local religion? Third, what does Christianity's localization in Fuan tell us about the relationship between late imperial Chinese society and religion? The study's implications extend beyond the issue of Christianity in China to the wider fields of religious and social history and the early modern history of global intercultural relations. The book suggests that Christianity became part of a pre-existing pluralistic, local religious space. The author argues that we underestimate late imperial society's tolerance for heterodoxy. The view from Fuan offers an original account of how a locality created its own religious culture in Ming-Qing China.

joshua bassett website: *Unflattening* Nick Sousanis, 2015-04-20 The primacy of words over images has deep roots in Western culture. But what if the two are inextricably linked, equal partners in meaning-making? Written and drawn entirely as comics, *Unflattening* is an experiment in visual thinking. Nick Sousanis defies conventional forms of scholarly discourse to offer readers both a stunning work of graphic art and a serious inquiry into the ways humans construct knowledge. *Unflattening* is an insurrection against the fixed viewpoint. Weaving together diverse ways of seeing drawn from science, philosophy, art, literature, and mythology, it uses the collage-like capacity of comics to show that perception is always an active process of incorporating and reevaluating different vantage points. While its vibrant, constantly morphing images occasionally serve as illustrations of text, they more often connect in nonlinear fashion to other visual references throughout the book. They become allusions, allegories, and motifs, pitting realism against abstraction and making us aware that more meets the eye than is presented on the page. In its graphic innovations and restless shape-shifting, *Unflattening* is meant to counteract the type of narrow, rigid thinking that Sousanis calls "flatness." Just as the two-dimensional inhabitants of Edwin A. Abbott's novella *Flatland* could not fathom the concept of "upwards," Sousanis says, we are often unable to see past the boundaries of our current frame of mind. Fusing words and images to produce new forms of knowledge, *Unflattening* teaches us how to access modes of understanding beyond what we normally apprehend.

joshua bassett website: *Matrimony* Joshua Henkin, 2008-08-26 It's the fall of 1986, and Julian Wainwright, an aspiring writer, arrives at Graymont College in New England. Here he meets Carter Heinz, with whom he develops a strong but ambivalent friendship, and beautiful Mia Mendelsohn, with whom he falls in love. Spurred on by a family tragedy, Julian and Mia's love affair will carry them to graduation and beyond, taking them through several college towns, over the next fifteen years. Starting at the height of the Reagan era and ending in the new millennium, *Matrimony* is a stunning novel of love and friendship, money and ambition, desire and tensions of faith. It is a richly detailed portrait of what it means to share a life with someone-to do it when you're young, and to try to do it afresh on the brink of middle age.

joshua bassett website: *Capital in the Twenty-First Century* Thomas Piketty, 2017-08-14 What are the grand dynamics that drive the accumulation and distribution of capital? Questions about the long-term evolution of inequality, the concentration of wealth, and the prospects for economic growth lie at the heart of political economy. But satisfactory answers have been hard to find for lack of adequate data and clear guiding theories. In this work the author analyzes a unique collection of data from twenty countries, ranging as far back as the eighteenth century, to uncover key economic and social patterns. His findings transform debate and set the agenda for the next generation of thought about wealth and inequality. He shows that modern economic growth and the

diffusion of knowledge have allowed us to avoid inequalities on the apocalyptic scale predicted by Karl Marx. But we have not modified the deep structures of capital and inequality as much as we thought in the optimistic decades following World War II. The main driver of inequality--the tendency of returns on capital to exceed the rate of economic growth--today threatens to generate extreme inequalities that stir discontent and undermine democratic values if political action is not taken. But economic trends are not acts of God. Political action has curbed dangerous inequalities in the past, the author says, and may do so again. This original work reorients our understanding of economic history and confronts us with sobering lessons for today.

Highly recommended." —Lin-Manuel Miranda, star and creator of the musical, *Hamilton* "An exceptional swan song for a beloved character." —Kirkus Reviews (starred review) Third time's a charm! Nate Foster returns home to Jankburg, Pennsylvania, to face his biggest challenge yet—high school—in this final novel in the Lambda Literary Award-winning Nate trilogy, which The New York Times calls "inspired and inspiring." When the news hits that *E.T.: The Musical* wasn't nominated for a single Tony Award—not one!—the show closes, leaving Nate both out of luck and out of a job. And while Nate's cast mates are eager to move on (the boy he understudies already landed a role on a TV show!), Nate knows it's back to square one, also known as Jankburg, Pennsylvania. Where horror (read: high school) awaits. Desperate to turn his life from flop to fabulous, Nate takes on a huge freshman English project with his BFF, Libby: he's going to make a musical out of Charles Dickens's *Great Expectations*. (What could possibly go...right?) But when Nate's New York crush ghosts him, and his grades start to slip, he finds the only thing harder than being on Broadway is being a freshman — especially when you've got a secret you're desperate to sing out about. This magical conclusion to Tim Federle's beloved Nate series is a love letter to theater kids young and not-so-young—and for anyone who ever wondered if they could truly go home again. Especially when doing so means facing everything you thought you'd left behind.

joshua bassett website: Five, Six, Seven, Nate! Tim Federle, 2014-01-21 "The Nate series by Tim Federle is a wonderful evocation of what it's like to be a theater kid. Highly recommended."
—Lin-Manuel Miranda, star and creator of the musical, *Hamilton* Winner of the Lambda Literary Award Encore! Armed with a one-way ticket to New York City, small-town theater geek Nate is off to start rehearsals for *E.T.: The Broadway Musical*. It's everything he ever practiced his autograph for! But as thrilling as Broadway is, rehearsals are nothing like Nate expects: full of intimidating child stars, cut-throat understudies, and a director who can't even remember Nate's name. Now, as the countdown to opening night is starting to feel more like a time bomb, Nate is going to need more than his lucky rabbit's foot if he ever wants to see his name in lights. joshua bassett website: The Rhetoric of Food Joshua Frye, Michael S. Bruner, 2012 This book focuses on the rhetoric of food and the power dimensions that intersect this most fundamental but increasingly popular area of ideology and practice, including politics, culture, lifestyle, identity, advertising, environment, and economy. The essays visit a rich variety of dominant discourses and material practices through a range of media, channels, and settings including the White House, social movement rhetoric, televisual programming, urban gardens, farmers markets, domestic and international agriculture institutions, and popular culture. Rhetoricians address the cultural, political, and ecological motives and consequences of humanse(tm) strategic symbolizing and attendant choice-making, visiting discourses and practices that have impact on our species in their producing, distributing, regulating, marketing, packaging, consuming, and talking about food. The essays in this book are representative of dominant and marginal discourses as well as perennial issues surrounding the rhetoric of food and include macro-, meso-, and micro-level analyses and case studies, from international neoliberal trade policies to media and social movement discourse to small group and interactional dynamics. This volume provides an excellent range and critical illumination of rhetorice(tm)s role as both instrumental and constitutive force in food representations, and its symbolic and material effects.
