kp engage: The Lion that Didn't Roar Nigel Davidson, 2016-10-06 In 2017 it will be Australia's turn to chair the Kimberley Process Certification Scheme (KP), an international organisation set up to regulate the trade in diamonds. Diamonds are a symbol of love, purchased to celebrate marriage, and it is therefore deeply ironic that the diamond trade has become linked with warfare and human rights violations committed in African producer countries such as Sierra Leone, the Democratic Republic of Congo and, more recently, Zimbabwe and Angola. In their quest for diamonds, or by using diamonds to purchase weapons, armed groups in these countries have engaged in recruiting child soldiers, amputating limbs, and committing rape and murder. In response to the problem, the international community, non-governmental organisations and key industry players such as De Beers combined forces to create the Kimberley Process in 2002. The KP uses an export certificate system to distinguish the legitimate rough diamond trade from so-called 'blood diamonds', which are also known as 'conflict diamonds'. This book considers the extent to which the KP, supported by other agencies at the international and national levels, has been effective in achieving its mandate. In so doing, it presents an original model derived from the domain of regulatory theory, the Dual Networked Pyramid, as a means of describing the operation of the system and suggesting possible improvements that might be made to it.

Hickey, 2017-09-05 William Wordsworth (1770-1850) needs little introduction as the central figure in Romantic poetry and a crucial influence in the development of poetry generally. This broad-ranging survey redefines the variety of his writing by showing how it incorporates contemporary concepts of language difference and the ways in which popular and serious literature were compared and distinguished during this period. It discusses many of Wordsworth's later poems, comparing his work with that of his regional contemporaries as well as major writers such as Scott. The key theme of relationship, both between characters within poems and between poet and reader, is explored through Wordsworth's construction of community and his use of power relationships. A serious discussion of the place of sexual feeling in his writing is also included.

It presents international law and lawyers with a wide range of novel issues, practical as well as conceptual. These challenges are addressed in this volume with great authority by many of the leading international law scholars of our generation. It is an important and distinctive contribution to the burgeoning literature on an issue critical for the future of our planet.' - David Freestone, George Washington University, US Climate change will fundamentally affect every area of human endeavour, including the development of international law. This book maps the current and potential impacts of climate change on the norms, principles, rules and processes of international law. This timely study brings together a group of leading scholars in their respective fields of international law to examine the impacts of climate change, and our responses to it, on the whole spectrum of international legal regimes, including those dealing with everything from climate displacement, human rights, and international trade and investment, to the oceans, the environment, armed conflicts and the use of force, and outer-space. the volume also examines the impacts of climate change on the underlying principles and processes of international law including those relating to the making and enforcement of international law and to third party dispute resolution. the book shows that there is much more to dealing with climate change than negotiating one global climate change-specific regime. Other areas of international law can, and must, be included in the

solution. In this way international law can maximise its coherence and its efficacy. This well-documented study will appeal to international lawyers, academics, policy makers, government employees, negotiators, practitioners, international legal theorists and anyone interested in climate change and how to maximise our international legal and policy responses to it.

kp engage: From Blood Diamonds to the Kimberley Process Franziska Bieri, 2016-04-15 In the late 1990s, several non-governmental organizations (NGOs) focused world attention on the issue of conflict diamonds which funded wars, massive death, and refugee crises across Central and West Africa. Several governments, NGOs, and key industry players engaged in negotiations under the so-called Kimberley Process (KP). A voluntary global agreement came into effect leading to a substantial decline in illicit diamond trade. Despite its importance in international affairs, the KP remains understudied in academia. Franziska Bieri's book provides the first comprehensive account of the KP and is the first to reveal how NGOs have become critical actors in their own right, possessing the ability to directly influence policies and to participate in the decision making and the implementation of global agreements. In developing this argument, Bieri explains: why the NGO campaign to raise awareness was successful; why a rapid and comprehensive resolution on such a complex global problem was possible; how the tripartite negotiations between states, NGOs, and industry developed during the implementation of the agreement, which is an on-going process. Based on extensive personal interviews with prominent campaigners, leading bureaucrats, and industry officials, hundreds of KP publications, official UN documents, industry news, and NGO reports, this timely book allows for a much needed engagement in contemporary debates about the campaign against conflict diamonds, the Kimberley Process, and the themes defining today's global governance arena.

kp engage: The Orthodox Church in Ukraine Nicholas E. Denysenko, 2018-11-23 The bitter separation of Ukraine's Orthodox churches is a microcosm of its societal strife. From 1917 onward, church leaders failed to agree on the church's mission in the twentieth century. The core issues of dispute were establishing independence from the Russian church and adopting Ukrainian as the language of worship. Decades of polemical exchanges and public statements by leaders of the separated churches contributed to the formation of their distinct identities and sharpened the friction amongst their respective supporters. In *The Orthodox Church in Ukraine*, Nicholas Denysenko provides a balanced and comprehensive analysis of this history from the early twentieth century to the present. Based on extensive archival research, Denysenko's study examines the dynamics of church and state that complicate attempts to restore an authentic Ukrainian religious identity in the contemporary Orthodox churches. An enhanced understanding of these separate identities and how they were forged could prove to be an important tool for resolving contemporary religious differences and revising ecclesial policies. This important study will be of interest to historians of the church, specialists of former Soviet countries, and general readers interested in the history of the Orthodox Church--Publisher's website.

Adler are among a team of researchers who have been tracking the evolution of the partnership between Kaiser Permanente and the Coalition of Kaiser Permanente Unions ever since 2001. They review the history of health care labor relations and present a profile of Kaiser Permanente as it has developed over the years. It brings to attention crucial elucidations of the increasing demand and complexity placed on school leaders through the use of case studies. Each chapter in the book focuses on a particular issue which has become important or has gained renewed importance in the Singapore education system. The chapters first provide a background to the theme under examination and a theoretical basis for discussion. They then narrate the case that shows how school leaders interpret and implement policy initiatives in their respective schools or lead change in that area. The case studies span over a wide range of domains such as instructional leadership, assessment leadership, stakeholder engagement, professional learning communities, and school branding. The data collected from these case studies came primarily from interviews of educators in their respective school contexts, in addition to other sources of data such as artifacts. Each case study highlights descriptions, interpretations, and perspectives across school contexts, which is consistent with the proposition that school leadership is very much shaped by context. At the end of each chapter, there are guiding questions to help readers critically analyse and reflect on the main learning points of the case.

kp engage: *Energy and Global Climate Change* Anilla Cherian, 2015-07-23 *Energy and Global Climate Change: Bridging the Sustainable Development Divide* focuses attention on two urgent global development challenges faced by the UN and its member states: access to sustainable energy for all, and global climate change. This book presents compelling evidence about an often neglected aspect of the energy-climate change-development nexus faced by millions of poor: problems caused by the use of inefficient and polluting energy sources, and the lack of access to sustainable energy services. Based on a detailed examination of major UN global climate change and sustainable development negotiated outcomes over the course of several decades, this book argues in a powerful and insightful manner that intergovernmental negotiated outcomes aimed at solving the climate change and energy access challenges have been restricted by being placed in different negotiating silos. This "silozation" or compartmentalization has resulted in separate tracks of negotiated outcomes on two inextricably linked global development challenges; and, has thereby hindered prospects for integrated action. This book points out that the existence of these two silos is especially hard to ignore in light of the urgent UN-led quest for an integrated and universal post-2015 development agenda anticipated to be anchored by new sustainable development goals on energy access and climate change. By addressing the heavy reliance on inefficient and polluting energy services which result in indoor air pollution and short lived climate pollutants that tragically impact millions of poor people, this book highlights the unique importance of integrated action on the energy-poverty-climate change nexus in the UN's post-2015 development era.

The book is a valuable and accessible tool for those on professional pathways to Qualified Teacher Status (QTS) or Early Years Teacher Status (EYTS) or those engaged in Early Childhood Studies programmes or similar degree programmes courses relating to early years practice. This book will also be of interest to those engaged in continuous professional development (CPD) programmes. The book recognises the important contribution that early years education and care can make to children's future outcomes. It can be read in-depth or dipped into when need arises. Each chapter

will help the reader to engage with challenging concepts and ideas which underpin early childhood policy and practice. Strong practical elements to the book aim to support the application of learning to high quality practice with young children. The generic term 'early childhood professional' is used throughout the book to encompass the diversity of roles within early childhood practice. The book aims to support the reader to critically consider the complexity of 'being professional' in contemporary early childhood practice by providing a strong theoretical and practice-based framework of the role and context of the early childhood professional. Key features of the book include: • Reflective tasks to support critical thinking about key aspects of professional practice • Case studies to enable the reader to learn from stories and situations about real professionals and their practice • Positive Practice Impact (PPI) boxes to provide specific examples of good professional practice in early childhood. Each chapter of this essential text concludes by signposting further reading – book chapters, journal articles, websites – to build greater depth of knowledge and extend the reader's understanding of early childhood theory and practice.

kp engage: Facets of Power Saunders, Richard, Nyamunda, Tinashe, 2016-04-18 The diamond fields of Chiadzwa, among the world's largest sources of rough diamonds have been at the centre of struggles for power in Zimbabwe since their discovery in 2006. Against the backdrop of a turbulent political economy, control of Chiadzwa's diamonds was hotly contested. By 2007 a new case of 'blood diamonds' had emerged, in which the country's security forces engaged with informal miners and black market dealers in the exploitation of rough diamonds, violently disrupting local communities and looting a key national resource. The formalisation of diamond mining in 2010 introduced new forms of large-scale theft, displacement and rights abuses. Facets of Power is the first comprehensive account of the emergence, meaning and profound impact of Chiadzwa's diamonds. Drawing on new fieldwork and published sources, the contributors present a graphic and accessibly written narrative of corruption and greed, as well as resistance by those who have suffered at the hands of the mineral's secretive and violent beneficiaries. If the lessons of resistance have been mostly disheartening ones, they also point towards more effective strategies for managing public resources, and mounting democratic challenges to elites whose power is sustained by preying on them.

kp engage: Motor Learning and Performance Richard A. Schmidt, Timothy D. Lee, 2019-09-18 Motor Learning and Performance: From Principles to Application, Sixth Edition With Web Study Guide, enables students to appreciate high-level skilled activity and understand how such incredible performances occur. Written in a style that is accessible even to students with little or no knowledge of physiology, psychology, statistical methods, or other basic sciences, this text constructs a conceptual model of factors that influence motor performance, outlines how motor skills are acquired and retained with practice, and shows students how to apply the concepts to a variety of real-world settings. The sixth edition of Motor Learning and Performance has been carefully revised to incorporate the most important research findings in the field, and it is supplemented with practice situations to facilitate a stronger link between research-based principles and practical applications. Other highlights include the following: A web study guide offers updated principles-to-application exercises and additional interactive activities for each chapter, ensuring that students will be able to transfer core content from the book to various applied settings. Extensive updates and new material related to the performance of complex movements expand the theoretical focus to a more in-depth analysis of dynamical systems and the constraints-led approach to learning. Narratives from Motor Control in Everyday Actions that appear in the web study guide tie each book chapter to concrete examples of how motor behavior is applicable to real life. Photo caption activities pose questions to students to encourage critical thinking, and answers to those questions are provided to instructors in the instructor guide. As the text investigates the principles of human performance, pedagogical aids such as learning objectives, key terms, and Check Your Understanding questions help students stay on track with learning in each chapter. Focus on Research and Focus on Application sidebars deliver more detailed research information and make connections to real-world applications in areas such as teaching, coaching, and therapy. The sixth edition of Motor Learning and Performance:

From Principles to Application goes beyond simply presenting research—it challenges students to grasp the fundamental concepts of motor performance and learning and then go a step further by applying the concepts. Incorporating familiar scenarios brings the material to life for students, leading to better retention and greater interest in practical application of motor performance and learning in their everyday lives and future careers.
