national cremation hudson fl: *Descendants of William Cromartie and Ruhamah Doane*
Amanda Cook Gilbert, 2013 This ambitious work chronicles 250 years of the Cromartie family genealogical history. Included in the index of nearly fifty thousand names are the current generations, and all of those preceding, which trace ancestry to our family patriarch, William Cromartie, who was born in 1731 in Orkney, Scotland, and his second wife, Ruhamah Doane, who was born in 1745. Arriving in America in 1758, William Cromartie settled and developed a plantation on South River, a tributary of the Cape Fear near Wilmington, North Carolina. On April 2, 1766, William married Ruhamah Doane, a fifth-generation descendant of a Mayflower passenger to Plymouth, Stephen Hopkins. If Cromartie is your last name or that of one of your blood relatives, it is

almost certain that you can trace your ancestry to one of the thirteen children of William Cromartie, his first wife, and Ruhamah Doane, who became the founding ancestors of our Cromartie family in America: William, Jr, James, Thankful, Elizabeth, Hannah Ruhamah, Alexander, John, Margaret Nancy, Mary, Catherine, Jean, Peter Patrick, and Ann E. Cromartie. These four volumes hold an account of the descent of each of these first-generation Cromarties in America, including personal anecdotes, photographs, copies of family bibles, wills, and other historical documents. Their pages hold a personal record of our ancestors and where you belong in the Cromartie family tree.

national cremation hudson fl: *Cremation and the Archaeology of Death* Jessica Cerezo-Román, Anna Wessman, Howard Williams, 2017-03-24 The fiery transformation of the dead is replete in our popular culture and Western modernity's death ways, and yet it is increasingly evident how little this disposal method is understood by archaeologists and students of cognate disciplines in the humanities and social sciences. In this regard, the archaeological study of cremation has much to offer. Cremation is a fascinating and widespread theme and entry-point in the exploration of the variability of mortuary practices among past societies. Seeking to challenge simplistic narratives of cremation in the past and present, the studies in this volume seek to confront and explore the challenges of interpreting the variability of cremation by contending with complex networks of modern allusions and imaginings of cremations past and present and ongoing debates regarding how we identify and interpret cremation in the archaeological record. Using a series of original case studies, the book investigates the archaeological traces of cremation in a varied selection of prehistoric and historic contexts from the Mesolithic to the present in order to explore cremation from a practice-oriented and historically situated perspective.

national cremation hudson fl: Icons in Ash Heide Hatry, 2017 The art of the human image

arose millennia ago as a way beyond impermanence and, especially, to keep the dead among us. The pictorial object - the icon - often carried a charge as ritual or ceremonial artifact and, indeed, as a thing with a certain power. The artist Heide Hatry has extended this tradition by creating realistic portraits made out of the actual ashes of the departed person portrayed. Are the results reminiscent of ancient sacred and secular traditions and their complex, even mysterious function to, say, calm, enrich or transform our experience? Icons in Ash includes twenty of Hatry's portraits and twenty-seven contemporary writers who explore this phenomenon in original and engaging meditations on death, the dead body, art, relics, psychology, philosophy, religion, mourning, evolution, transformation, and immortality. Contributors include, among others, Hans Belting, Mark Dery, Eleanor Heartney, Siri Hustvedt, Jonas Mekas, Rick Moody, Mark Pachter, Steven Pinker, Wolf Singer, Luisa Valenzuela, and Peter Weibel. By reconstructing as complete a picture as possible of this group of women, Green and LaDuke reveal insights into the larger scientific and cultural communities in which they lived and worked. The book contains an extended introductory essay, as well as biographical entries for each of the 228 women in the study. The authors examine family backgrounds, education, careers, and other professional activities. They show that there were many more women earning PhD's in mathematics before 1940 than is commonly thought.
