**series after omen of the stars:** *The Three Stars Each* Wayne Horowitz, 2014 This book discusses the history and impact of the Astrolabe group of cuneiform texts and tablets on Mesopotamian and world civilization.

**series after omen of the stars:** *Babylonian Planetary Omens: without special title* Erica Reiner, 1998-01-01 This third fascicle of Babylonian Planetary Omens contains the edition of all cuneiform texts dealing with the planet Venus known to us. Most of these tablets are kept in the British Museum; the large number of unpublished texts were transliterated and the previously published texts were checked and collated from the originals. The texts are accompanied by translations, and each group of texts is commented upon by David Pingree from the point of view of the text history and astronomical significance. A general introduction, also by David Pingree, analyzes the descriptions of Venus that occur in the texts in terms of astronomical phenomena. Indices are included to facilitate the study of this large corpus.

**series after omen of the stars:** *Tai Ahoms and the Stars* , 2018-05-31 Studies on Southeast Asia 10 The ancient but not completely forgotten language of Ahom (part of a culture that once dominated the Brahmaputra Valley in India) has been marked by a lack of competent critical and scholarly study. The present authors aim to correct this: in their work they include a useful introduction to the state of Ahom studies and about linguistic problems and possibilities. The three primary texts studied are presented in their Ahom characters, in transliteration, and in translation into Thai and English, and are the subjects of both literary and historical interpretation. In the final section, the scholar J. C. Eade presents an essay entitled Astronomy in the Texts: Is there any Coherence? The relevant pages from the three original manuscripts that gave rise to the established texts are reproduced here as well.
