## **Decoding the UC Berkeley Graduate Division: Your Comprehensive Guide**

### Introduction:

Aspiring to pursue graduate studies at the prestigious University of California, Berkeley? The UC Berkeley Graduate Division is a labyrinth of programs, departments, and opportunities, making the application process daunting for many. This comprehensive guide cuts through the complexity, offering a clear roadmap to navigate the division, understand its offerings, and successfully launch your graduate career at one of the world's leading universities. We'll explore everything from application requirements to funding opportunities, providing you with the knowledge to confidently pursue your academic dreams. This in-depth exploration of the UC Berkeley Graduate Division will equip you with the insights you need to make informed decisions and maximize your chances of acceptance.

## **I. Understanding the UC Berkeley Graduate Division: Structure and Organization**

The UC Berkeley Graduate Division isn't just a single entity; it's an umbrella organization overseeing graduate education across a vast array of disciplines. It serves as the central hub for policy, admissions, and support services for thousands of graduate students. Understanding its structure is key to efficiently navigating the application process and accessing resources. The division is organized into various colleges, schools, and departments, each with its own specific requirements and admissions committees. Knowing which department houses your program of interest is the first crucial step. The Graduate Division website itself provides a detailed organizational chart, but understanding the broad strokes is essential before diving into the specifics of individual programs. This involves knowing how to locate your specific program's contact person and understanding the departmental structures. This will help you not only with the application process but also with navigating any issues or questions that may arise throughout your graduate studies.

## **II. Exploring Academic Programs: A Diverse Landscape of Opportunities**

UC Berkeley offers an unparalleled breadth of graduate programs, encompassing everything from the humanities and social sciences to engineering, natural sciences, and professional schools. The sheer variety can be overwhelming, but understanding the classification system can help you narrow down your options. The Graduate Division website provides detailed descriptions of each program, including faculty profiles, research areas, and curriculum details. Don't just read the program descriptions superficially. Deeply research the faculty whose work aligns with your interests.

Reaching out to professors whose research excites you can significantly boost your application and demonstrates your genuine interest in the program. Exploring the research labs and their current projects, as well as student testimonials can give you a clearer picture of what the program entails.

### **III. The Application Process: A Step-by-Step Guide**

Applying to the UC Berkeley Graduate Division requires meticulous planning and careful execution. The application process is rigorous and competitive, demanding a well-crafted application package. This includes a compelling statement of purpose tailored to each program, strong letters of recommendation from individuals who can speak to your academic capabilities and research potential, and official transcripts reflecting your prior academic achievements. Standardized tests like the GRE (depending on the program) are often required, further emphasizing the need for thorough preparation. Begin the application process well in advance of the deadlines. Many programs have rolling admissions, meaning applications are reviewed as they are received, so early application significantly increases your chances. Proofread everything multiple times – even a minor error can jeopardize your application. Consider seeking assistance from career services or academic advisors to polish your application materials.

### **IV. Funding Your Graduate Education: Securing Financial Aid and Fellowships**

Graduate education at UC Berkeley is an investment, and securing funding is crucial for most students. Fortunately, the Graduate Division offers various funding opportunities, including fellowships, assistantships (research or teaching), and loans. Researching these funding options early is essential, as many require separate applications with earlier deadlines than the general admissions process. Building strong relationships with prospective faculty can increase your chances of securing funding through research assistantships. Many departments offer their own internal fellowships and scholarships, so be sure to explore those resources as well. Explore external funding options provided by organizations related to your field. Networking and attending conferences can open doors to funding opportunities you might not otherwise discover.

### **V. Life as a Graduate Student at UC Berkeley: Resources and Support**

The UC Berkeley Graduate Division provides a range of resources and support services to help graduate students succeed. These resources extend beyond academics, encompassing career counseling, mental health services, and access to various campus facilities and organizations. Familiarize yourself with these resources early on – they are invaluable in navigating the challenges and demands of graduate study. Take advantage of workshops and seminars designed to enhance your research, writing, and presentation skills. Networking with fellow graduate students can create a supportive community and provide valuable insights and mentorship.

**uc berkeley graduate division:** [Inside Graduate Admissions](#) Julie R. Posselt, 2016-01-11 How does graduate admissions work? Who does the system work for, and who falls through its cracks?

More people than ever seek graduate degrees, but little has been written about who gets in and why. Drawing on firsthand observations of admission committees and interviews with faculty in 10 top-ranked doctoral programs in the humanities, social sciences, and natural sciences, education professor Julie Posselt pulls back the curtain on a process usually conducted in secret. “Politicians, judges, journalists, parents and prospective students subject the admissions policies of undergraduate colleges and professional schools to considerable scrutiny, with much public debate over appropriate criteria. But the question of who gets into Ph.D. programs has by comparison escaped much discussion. That may change with the publication of *Inside Graduate Admissions*...While the departments reviewed in the book remain secret, the general process used by elite departments would now appear to be more open as a result of Posselt’s book.” —Scott Jaschik, *Inside Higher Ed* “Revealing...Provide[s] clear, consistent insights into what admissions committees look for.” —Beryl Lieff Benderly, *Science*

**uc berkeley graduate division:** *Thriving in Graduate School* Arielle Shanok, Nicole Benedicto Elden, 2021-08-02 Addresses the mental health challenges of graduate school and how students can succeed and thrive. With rates of depression and anxiety six times higher among graduate students than the general population, maintaining emotional wellbeing in graduate school is vital! Students must be prepared with skills that will not only help them perform well but also help them feel well. *Thriving in Graduate School: The Expert's Guide to Success and Wellness* is the first book on graduate student mental health written by mental health professionals. It promotes psychologically healthy approaches to navigating the graduate school experience and teaches students that they are not alone in their mental health struggles. The authors introduce students to unique perspectives that are key to positive mental health. Additionally, this is the only book of its type to explore issues routinely faced by historically marginalized graduate students. Special sections at the end of each chapter written for faculty, administrators, and mental health professionals augment the book by suggesting ways that each of these groups can help guide and support graduate students through their journey. Featuring vignettes and experiences from actual graduate students, *Thriving in Graduate School* sheds light on common—but hidden—truths to help students manage the many challenges they will face and even thrive during their graduate school years. Written with compassion and humor, this is a must read for prospective students and those who seek to support them.

**uc berkeley graduate division:** *Getting Mentored in Graduate School* W. Brad Johnson, Jennifer M. Huwe, 2003 *Getting Mentored in Graduate School* is the first guide to mentoring relationships written exclusively for graduate students. Research has shown that students who are mentored enjoy many benefits, including better training, greater career success, and a stronger professional identity. Authors Johnson and Huwe draw directly from their own experiences as mentor and protege to advise students on finding a mentor and maintaining the mentor relationship throughout graduate school. Conversational, accessible, and informative, this book offers practical strategies that can be employed not only by students pursuing mentorships but also by professors seeking to improve their mentoring skills. Johnson and Huwe arm readers with the tools they need to anticipate and prevent common pitfalls and to resolve problems that may arise in mentoring relationships. This book is essential reading for students who want to learn and master the unwritten rules that lead to finding a mentor and getting more from graduate school and your career.

What the U.S. needs, instead, is another Teddy Roosevelt and his energetic trust-busting. Is that still

imaginable? All believers in the virtues of competitive capitalism must hope so.” —Martin Wolf, Financial Times “In one industry after another...a few companies have grown so large that they have the power to keep prices high and wages low. It’s great for those corporations—and bad for almost everyone else.” —David Leonhardt, New York Times “Argues that the United States has much to gain by reforming how domestic markets work but also much to regain—a vitality that has been lost since the Reagan years...His analysis points to one way of making America great again: restoring our free-market competitiveness.” —Arthur Herman, Wall Street Journal Why are cell-phone plans so much more expensive in the United States than in Europe? It seems a simple question, but the search for an answer took one of the world’s leading economists on an unexpected journey through some of the most hotly debated issues in his field. He reached a surprising conclusion: American markets, once a model for the world, are giving up on healthy competition. In the age of Silicon Valley start-ups and millennial millionaires, he hardly expected this. But the data from his cutting-edge research proved undeniable. In this compelling tale of economic detective work, we follow Thomas Philippon as he works out the facts and consequences of industry concentration, shows how lobbying and campaign contributions have defanged antitrust regulators, and considers what all this means. Philippon argues that many key problems of the American economy are due not to the flaws of capitalism or globalization but to the concentration of corporate power. By lobbying against competition, the biggest firms drive profits higher while depressing wages and limiting opportunities for investment, innovation, and growth. For the sake of ordinary Americans, he concludes, government needs to get back to what it once did best: keeping the playing field level for competition. It’s time to make American markets great—and free—again.

**uc berkeley graduate division: The Limits of the Legal Complex** Malcolm Feeley, Malcolm Langford, 2021 Spanning two centuries and five Nordic countries, this book questions the view that political lawyers are required for the development of a liberal political regime. It combines cross-disciplinary theory and careful empirical case studies by country experts whose regional insights are brought to bear on wider global contexts. The theory of the legal complex posits that lawyers will not simply mobilize collectively for material self-interest; instead they will organize and struggle for the limited goal of political liberalism. Constituted by a moderate state, core civil rights, and civil society freedoms, political liberalism is presented as a discrete but professionally valued good to which all lawyers can lend their support. Leading scholars claim that when one finds struggles against political repression, politics of the Legal Complex are frequently part of that struggle. One glaring omission in this research program is the Nordic region. This insightful volume provides a comprehensive account of the history and politics of lawyers of the last 200 years in the Nordic countries: Norway, Sweden, Denmark, Finland, and Iceland. Topping most global indexes of core civil rights, these states have been found to contain few to no visible legal complexes. Where previous studies have characterized lawyers as stewards and guardians of the law that seek to preserve its semi-autonomous nature, these legal complexes have emerged in a manner that challenges the standard narrative. This book offers rational choice and structuralist explanations for why and when lawyers mobilise collectively for political liberalism. In each country analysis, authors place lawyers in nineteenth century state transformation and emerging constitutionalism, followed by expanding democracy and the welfare state, the challenge of fascism and world war, the tensions of the Cold War, and the latter-day rights revolutions. These analyses are complemented by a comprehensive comparative introduction, and a concluding reflection on how the theory of the legal complex might be recast, making *The Limits of the Legal Complex* an invaluable resource for scholars and practitioners alike.

**uc berkeley graduate division: Equivalence** Amanda L. Golbeck, 2017-04-28 *Equivalence*: Elizabeth L. Scott at Berkeley is the compelling story of one pioneering statistician's relentless twenty-year effort to promote the status of women in academe and science. Part biography and part microhistory, the book provides the context and background to understand Scott's masterfulness at using statistics to help solve societal problems. In addition to being one of the first researchers to work at the interface of astronomy and statistics and an early practitioner of statistics using high-speed computers, Scott worked on an impressively broad range of questions in science, from whether cloud seeding actually works to whether ozone depletion causes skin cancer. Later in her career, Scott became swept up in the academic women's movement. She used her well-developed scientific research skills together with the advocacy skills she had honed, in such activities as raising funds for Martin Luther King Jr. and keeping Free Speech Movement students out of jail, toward policy making that would improve the condition of the academic workforce for women. The book invites the reader into Scott's universe, a window of inspiration made possible by the fact that she saved and dated every piece of paper that came across her desk.

**uc berkeley graduate division: Design Research in Education** Arthur Bakker, 2018-07-06 *Design Research in Education* is a practical guide containing all the information required to begin a design research project. Providing an accessible background to the methodological approaches used in design research as well as addressing all the potential issues that early career researchers will encounter, the book uniquely helps the early career researcher to gain a full overview of design research and the practical skills needed to get their project off the ground. Based on extensive experience, the book also contains multiple examples of design research from both undergraduate and postgraduate students, to demonstrate possible projects to the reader. With easy to follow chapters and accessible question and response sections, *Design Research in Education* contains practical advice on a wide range of topics related to design research projects including: The theory of design research, what it entails, and when it is suitable The formulation of research questions How to structure a research project The quality of research and the methodological issues of validity and reliability How to write up your research The supervision of design research. Through its theoretical grounding and practical advice, *Design Research in Education* is the ideal introduction into the field of design based research and is essential reading for bachelor's, master's and PhD students new to the field, as well as to supervisors overseeing projects that use design research.

**uc berkeley graduate division: Who Killed the Berkeley School?** Herman Schwendinger, Julia R. Schwendinger, 2014 The Berkeley School of Criminology stands, to this day, as one of the most significant developments in criminological thought and action. Its diverse participants, students and faculty, were true innovators, producing radical social analyses (getting to the roots causes) of institutions of criminal justice as part of broader relations of inequality, injustice, exploitation, patriarchy, and white supremacy within capitalist societies. Even more, they situated criminology as an active part of opposition to these social institutions and the relations of harm they uphold. Their criminology was directly engaged in, and connected with, the struggles of resistance that emerged in the late 1960s and early 1970s. Not surprisingly perhaps, they became a target of regressive and reactionary forces that sought to quiet those struggles. Notably the Berkeley School

of Criminology was targeted by key players in the US military-industrial complex such as Ronald Reagan himself, then Governor of California and Regent of UC-Berkeley. *Who Killed the Berkeley School* by Julia and Herman Schwendinger, key players in the Berkeley School, is the first full-length, in-depth analysis of the Berkeley School of Criminology, its participants, and the attack against it. It tells the story of an important infrastructure of resistance, a resource of struggle, and how it was dismantled. It lays bare the role not only of conservatives but of liberal academics and false critical theorists, who failed to stand up in defense of the School and its work when called upon. This is a story with profound lessons in the current period of corporatization of campuses, neoliberal education, and market-driven curricula. It will be of interest to anyone concerned with developing resistance to the corporate campus and seeking critical alternatives. It also stands as a challenge to social science disciplines, including criminology, to develop a practice that identifies the roots of social injustice and organizes to confront it.

Shulman Book Prize Winner of the Wayne S. Vucinich Book Prize *The Soviet Union* was a notoriously closed society until Stalin's death in 1953. Then, in the mid-1950s, a torrent of Western novels, films, and paintings invaded Soviet streets and homes, acquiring heightened emotional significance. *To See Paris and Die* is a history of this momentous opening to the West. At the heart of this history is a process of translation, in which Western figures took on Soviet roles: Pablo Picasso as a political rabble-rouser; Rockwell Kent as a quintessential American painter; Erich Maria Remarque and Ernest Hemingway as teachers of love and courage under fire; J. D. Salinger and Giuseppe De Santis as saviors from Soviet clichés. Imported novels challenged fundamental tenets of Soviet ethics, while modernist paintings tested deep-seated notions of culture. Western films were eroticized even before viewers took their seats. The drama of cultural exchange and translation encompassed discovery as well as loss. Eleonory Gilburd explores the pleasure, longing, humiliation, and anger that Soviet citizens felt as they found themselves in the midst of this cross-cultural encounter. The main protagonists of *To See Paris and Die* are small-town teachers daydreaming of faraway places, college students vicariously discovering a wider world, and factory engineers striving for self-improvement. They invested Western imports with political and personal significance, transforming foreign texts into intimate belongings. With the end of the Soviet Union, the Soviet West disappeared from the cultural map. Gilburd's history reveals how domesticated Western imports defined the last three decades of the Soviet Union, as well as its death and afterlife.

The book organizes the teachers' research into three broad areas, corresponding to issues the new teachers identified as the most challenging. *The First Year of Teaching* offers an array of classroom scenarios that will spark in-depth discussions in teacher preparation classes and professional development workshops, particularly in the context of problem-based, problem-posing pedagogies.

**uc berkeley graduate division:** *The Problem of the Color[blind]* Brandi Wilkins Catanese, 2011-06-07 Catanese's beautifully written and cogently argued book addresses one of the most persistent sociopolitical questions in contemporary culture. She suggests that it is performance and the difference it makes that complicates the terms by which we can even understand 'multicultural' and 'colorblind' concepts. A tremendously illuminating study that promises to break new ground in the fields of theatre and performance studies, African American studies, feminist theory, cultural studies, and film and television studies. ---Daphne Brooks, Princeton University Adds immeasurably to the ways in which we can understand the contradictory aspects of racial discourse and performance as they have emerged during the last two decades. An ambitious, smart, and fascinating book. ---Jennifer DeVere Brody, Duke University Are we a multicultural nation, or a colorblind one? *The Problem of the Color[blind]* examines this vexed question in American culture by focusing on black performance in theater, film, and television. The practice of colorblind casting---choosing actors without regard to race---assumes a performing body that is somehow race neutral. But where, exactly, is race neutrality located---in the eyes of the spectator, in the body of the performer, in the medium of the performance? In analyzing and theorizing such questions, Brandi Wilkins Catanese explores a range of engaging and provocative subjects, including the infamous debate between playwright August Wilson and drama critic Robert Brustein, the film career of Denzel Washington, Suzan-Lori Parks's play *Venus*, the phenomenon of postblackness (as represented in the Studio Museum in Harlem's *Freestyle* exhibition), the performer Ice Cube's transformation from icon of gangsta rap to family movie star, and the controversial reality television series *Black. White.* Concluding that ideologies of transcendence are ahistorical and therefore unenforceable, Catanese advances the concept of racial transgression---a process of acknowledging rather than ignoring the racialized histories of performance---as her chapters move between readings of dramatic texts, films, popular culture, and debates in critical race theory and the culture wars.

**uc berkeley graduate division: *School Choice and Diversity*** Janelle T. Scott, 2005-08-20

This collection of essays will help readers to disentangle the complex relationship between school choice and student diversity in the post-Brown era. Presenting the views of the most prominent researchers of school choice reforms in the U.S., this book argues that the contexts under which school choice plans are adopted are actually responsible for shaping student diversity within schools. Using sociological, economic, and political analysis, the authors present studies of controlled and voluntary choice plans, charter schools, private school selection, and their interaction with race, social class, gender, and student disability.

**uc berkeley graduate division: *Looking Back*** Neil J. Dorans, Sandip Sinharay, 2011-07-15 In 2006, Paul W. Holland retired from Educational Testing Service (ETS) after a career spanning five decades. In 2008, ETS sponsored a conference, Looking Back, honoring his contributions to applied and theoretical psychometrics and statistics. Looking Back attracted a large audience that came to pay homage to Paul Holland and to hear presentations by colleagues who worked with him in special ways over those 40+ years. This book contains papers based on these presentations, as well as vignettes provided by Paul Holland before each section. The papers in this book attest to how Paul Holland's pioneering ideas influenced and continue to influence several fields such as social networks, causal inference, item response theory, equating, and DIF. He applied statistical thinking to a broad range of ETS activities in test development, statistical analysis, test security, and operations. The original papers contained in this book provide historical context for Paul Holland's work alongside commentary on some of his major contributions by noteworthy statisticians working today.

**uc berkeley graduate division: *Find Your Path*** Daniel Goodman, 2019-12-03 Scientists offer personal accounts of the challenges, struggles, successes, U-turns, and satisfactions encountered in their careers in industry, academia, and government. This insightful book offers essential life and career lessons for newly minted STEM graduates and those seeking a career change. Thirty-six leading scientists and engineers (including two Nobel Prize winners) describe the challenges, struggles, successes, satisfactions, and U-turns encountered as they established their careers. Readers learn that there are professional possibilities beyond academia, as contributors describe the paths that took them into private industry and government as well as to college and university campuses. They discuss their varying preferences for solitary research or collaborative teamwork; their attempts to achieve work-life balance; and unplanned changes in direction that resulted in a more satisfying career. Women describe confronting overt sexism and institutional gender bias; scientists of color describe the experience of being outsiders in their field. One scientist moves from startup to startup, enjoying a career of serial challenges; another spends decades at one university; another has worked in academia, industry, and government. Some followed in the footsteps of parents; others were the first in their family to go to college. Many have changed fields, switched subjects, or left established organizations for something new. Taken together, these essays make it clear that there is not one path to a profession in science, but many. Publications all over the world are increasingly using immersive storytelling—virtual reality, augmented reality and mixed reality—to tell compelling stories. The aim of this book is to distill the lessons learned thus far into a useful guide for reporters, filmmakers and writers interested in telling stories in this emerging medium. Examining ground-breaking work across industries, this text explains, in practical terms, how storytellers can create their own powerful immersive experiences as new media and platforms emerge.

**uc berkeley graduate division:** *Achieving College Dreams* Rhona S. Weinstein, Frank C. Worrell, 2016-03-17 *Achieving College Dreams: How a University-Charter District Partnership Created an Early College High School* tells the story of a remarkable 10-year collaboration between the University of California, Berkeley and Aspire Public Schools to develop and nurture the California College Preparatory Academy. Bridging the two cultures--artfully described as Pac-Man (the charter district) meets chess (the university)--the school serves as an exemplar in providing low-income and first-generation college youth with an excellent and equitable education. Framed by a longitudinal lens, findings from community-engaged scholarship, and a diversity of voices from students to superintendents, this book charts the journey from the initial decision to open a school to the high school graduation of its first two classes. The book captures struggle, improvement, and success as it takes readers inside the workings of the partnership, the development of the school, and the spillover of effects across district and university. Confronting the challenge of interweaving rigor and support, its authors explore such critical ingredients as teacher-student advisories; school transition; the home-school divide; building a supportive college-preparatory culture; teaching with depth, relational power, and equity; the forging of an academic identity; and scaling up. At a time of sharply unequal schools, glaring disparities in college readiness, and heightened expectations, *Achieving College Dreams* uniquely extends the knowledge base about how to better prepare underserved students for college eligibility and success. The book also calls for universities to step up to the plate as partners with districts to ensure both excellence and equity in secondary education for all children.

**uc berkeley graduate division:** *Learning Beyond the School* Julian Sefton-Green, Ola Erstad, 2018-08-06 Whilst learning is central to most understandings of what it is to be human, we

now live in a knowledge society where being educated defines life chances more than ever before. *Learning Beyond the School* brings together accounts of learning from around the world in organisations, spaces and places that are schooled, but not school. Exploring examples of learning organisation, pedagogisation, informal learning and social education, the book shows not only how understandings of education are framed in terms of local versions of schooling, but what being educated could and should mean in very different social and political contexts. With contributions from scholars based in Australia, Europe, the USA, Latin America and Asia, the book brings together accounts of learning outside of school. Chapters contain rich and detailed case studies of innovative projects, new kinds of learning institutions, youth, peer-driven and community-based activities and public pedagogies, as well as engaging with the dimensions of an argument about the place and nature of learning outside of the school. It challenges dominant versions of school around the world, whilst also critically discussing the value and place of non-institutionalised learning. *Learning Beyond the School* should be of interest to academics, researchers, postgraduate scholars engaged in the study of comparative education, youth work, education systems, digital culture, sociology of education and youth development. It should also be essential reading for practitioners and policymakers who are interested in youth and education system reform.

**uc berkeley graduate division: *Newsroom-Classroom Hybrids at Universities*** Gunhild Ring Olsen, 2020-05-27 This book investigates the success of U.S. nonprofit university centers, where students work alongside investigative reporters, from a professional and educational perspective. Drawing on a detailed investigation of four of the most prominent and renowned centers in the U.S. – the IRP Berkeley (UC Berkeley), the Stabile Center (Columbia University), the Workshop (American University), and the New England CIR (Boston University) – the newsroom role and the classroom role of university nonprofits is examined. Finding the description of a win-win situation – where overstretched newsrooms get extra resources; while students learn from the best – an oversimplification, the author explores learning outcomes, student experiences, financial benefits, and quality of the student output. Offering an in-depth analysis of the characteristics, challenges and benefits of different forms of journalistic cooperation, this book will be a useful resource to scholars, students and practitioners of journalism, journalism education, and media practice.

**uc berkeley graduate division: *Grad School Essentials*** Zachary Shore, 2016-01-05 What's the hardest part of grad school? It's not simply that the workload is heavy and the demands are high. It's that too many students lack efficient methods to let them do their best. Professor Zachary Shore aims to change this. With humorous, lively prose, Professor Shore teaches you to master the five most crucial skills you need to succeed: how to read, write, speak, act, and research at a higher level. Each chapter in this no-nonsense guide outlines a unique approach to acquiring a skill and then demonstrates how to enhance it. Through these concrete, practical methods, *Grad School Essentials* will save you time, elevate the quality of your work, and help you to earn the degree you seek.

**uc berkeley graduate division: *Transformative Pedagogies for Teacher Education*** Ann E. Lopez, Elsie L. Olan, 2019-07-01 This is the second book in the series *Transformative Pedagogies for Teacher Education*. Like the first book in the series it is geared towards practitioners in the field of teacher education. This second book focuses on action, agency and dialogue. It features chapters by a collection of teacher educators, researchers, teacher advocates and practitioners drawing on their research and experiences with teacher candidates to explore critical issues in teacher education. The book will be useful to teacher educators working with teacher candidates in different contexts, particularly diverse contexts. Given demographic shifts and the need for educators to respond to growing diversity in schools, educators will find valuable strategies in *Transformative Pedagogies in Teacher Education: Critical Action, Agency and Dialogue in Teaching and Learning Contexts* they can implement in their own practice. In addition to valuable strategies, authors explore different approaches and perspectives in teacher education in the preparation of teacher candidates for a changing world. Critical notions of education are posited from different perspectives and locations.

This book will be useful for schools, school boards and districts engaging in ongoing professional development of teachers. It will also be of value to school leaders and aspiring leaders in principal preparation programs as working with new teachers and teacher educators is an integral part of their role.
