cielo at domain: *Volume 10: Philosophy of Religion* Guttorm Fløistad, 2009-10-31 The present volume is a continuation of the series *Contemporary Philosophy*. As with the earlier volumes in the series, the present *Chronicles* purport to give a survey of significant trends in contemporary philosophy. The need for such surveys has, I believe, increased rather than decreased over the years. The philosophical scene appears, for various reasons, more complex than ever before. The continuing process of specialization in most branches, the increasing contact between philosophers

from various cultures, the emergence of new schools of thought, particularly in philosophical logic and in the philosophy of language and ethics, and the increasing attention being paid to the history of philosophy in discussions of contemporary problems, are the most important contributing factors. Surveys of the present kind are a valuable source of knowledge of this complexity. The surveys may therefore help to strengthen the Socratic element of modern philosophy, the intercultural dialogue or Kommunikationsgemeinschaft. So far, nine volumes have been published in this series, viz. Philosophy of Language and Philosophical Logic (Volume 1), Philosophy of Science (Volume 2), Philosophy of Action (Volume 3), Philosophy of Mind (Volume 4), African Philosophy (Volume 5), Medieval Age Philosophy (Volumes 6/1 and 6/2), Asian Philosophy (Volume 7), Philosophy of Latin America (Volume 8), and Aesthetics and Philosophy of Art (Volume 9).

cielo at domain: The Storm of Life A. R. Capetta, 2020-01-28 The sumptuous and powerful conclusion to the gender-fluid duet begun by The Brilliant Death, hailed in a starred review by Kirkus as a delicious and magical intrigue too tempting not to devour. By turns thrilling, witty, and heartbreaking, this dramatic conclusion to the Brilliant Death duet transports us to a Vinalia on the verge of transformation and radiates with the electric power of love. With her power over magic finally in hand, and her love for Cielo at last confessed, Teodora di Sangro should be on top of the world. But the country of Vinalia is in chaos as the dictator like Capo threatens to plunge them all into war and capture every strega in the land--including Teo and Cielo. Teo knows she can't take down the Capo alone. She must convince a small band of streghe who have been hiding in plain sight to join her in the cause. But as she struggles to bring them together, she discovers a far deadlier enemy than the Capo has been hunting her all along. Now everyone--especially Cielo--is in danger. What lengths will Teo go to in order to unite her country and save the one she loves?

cielo at domain: RealWorld Evaluation Michael Bamberger, Jim Rugh, Linda Mabry, 2011-11-29 This book addresses the challenges of conducting program evaluations in real-world contexts where evaluators and the agencies face budget and time constraints and where critical data is missing. The book is organized around a seven-step model developed by the authors, which has been tested and refined in workshops. Vignettes and case studies—representing evaluations from a variety of geographic regions and sectors—demonstrate adaptive possibilities for small projects with budgets of a few thousand dollars to large-scale, long-term evaluations. The text incorporates quantitative, qualitative, and mixed-method designs and this Second Edition reflects important developments in the field over the last five years.

cielo at domain: Biomanufacture of Functional Carbohydrates Jing Wu, Lingqia Su, 2024-06-12 Functional carbohydrates have low or moderate energy and health-promoting effects. They are greatly favored in a variety of areas, such as food, pharmaceuticals, feed, and agriculture. The low-cost and high-yield manufacturing of functional carbohydrates is a prerequisite for their widespread application. Compared to extraction and chemical methods, biomanufacture dominates the production of functional carbohydrates, and there have been continuous innovations and technological progress over the last decades. *Biomanufacture of Functional Carbohydrates* provides the systemic introduction of biomanufacture of ten functional carbohydrates. Each chapter introduces the function and application of a functional carbohydrate, and then focuses on the recent advancements of the enzymes and catalytic pathways associated with its biosynthesis. It provides detailed information on the structure and function, molecular modification, and preparation of the relative enzymes and the strategies of preparation of the functional carbohydrates catalyzed by single or complex enzymes and discusses the characteristics of different strategies. The microbial fermentation methods for producing some functional carbohydrates, including details about construction and regulation of recombinant strains, are also described. In addition, this book provides suggestions for future research in the biomanufacture of functional carbohydrates. Features: Presents detailed information of enzymes used for preparation of the functional carbohydrates Focuses on the structure and function, molecular modification, and preparation of the relative enzymes Introduces strategies of preparation of the functional carbohydrates catalyzed by single or complex enzymes Compares the characteristics of different strategies Readers will gain timely and comprehensive knowledge of the emerging science and technology around biomanufacture of functional carbohydrates and how to select, acquire, and use the appropriate enzymes to produce functional carbohydrates and advance the benefits of human life.

cielo at domain: *Blindsight* Peter Watts, 2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital

cielo at domain: *Castle in the Air* Diana Wynne Jones, 2012-09-25 In this stunning sequel to *Howl's Moving Castle*, Diana Wynne Jones has again created a large-scale, fast-paced fantasy in which people and things are never quite what they seem. There are good and bad djinns, a genie in a bottle, wizards, witches, cats and dogs (but are they cats and dogs?), and a mysterious floating castle filled with kidnapped princesses, as well as two puzzling prophecies. The story speeds along with tantalizing twists and turns until the prophecies are fulfilled, true identities are revealed, and all is resolved in a totally satisfying, breathtaking, surprise-filled ending. Abdullah was a young and not very prosperous carpet dealer. His father, who had been disappointed in him, had left him only enough money to open a modest booth in the Bazaar. When he was not selling carpets, Abdullah spent his time daydreaming. In his dreams he was not the son of his father, but the long-lost son of a prince. There was also a princess who had been betrothed to him at birth. He was content with his life and his daydreams until, one day, a stranger sold him a magic carpet. All fans of classic fantasy books deserve the pleasure of reading those by Diana Wynne Jones, whose acclaim included the World Fantasy Award for Life Achievement. As Neil Gaiman stated, she was quite simply the best writer for children of her generation. The three books in the *World of Howl* are: *Howl's Moving Castle* *Castle in the Air* *House of Many Ways* Other beloved series from Dianna Wynne Jones include the *Chronicles of Chrestomanci* and the *Dalemark Quartet*.

cielo at domain: *Playing with Gender* Maggie Gunsberg, 2017-12-02 This work takes gender as its point of entry into the comedies of Carlo Goldoni (1707-93). The dramatization of femininity and masculinity is explored in conjunction with that of other social categories (class, the family, and age). The plays reinforce the patriarchal association of femininity with the body, with spectacle, and with theatricality, while the dramatic backdrop of Venice and carnival provides a context for the staging of issues relating to identity, disguise and fashion. In the plays, pretence and theatricality vie with bourgeois Enlightenment values of morality, honesty and respectability to produce dramatic tension with distinct gender implications.

cielo at domain: *Federico García Lorca* Federico Bonaddio, 2010 A study of Lorca's poetic trajectory. This volume is one of few surveys in English of the whole of Lorca's poetry and the first to concentrate entirely on self-consciousness, a subject which it sees as central to our understanding of the work of a poet writing in the most self-conscious of literary periods: the Modernist era. Focusing on poems which have the poet, art and creativity as their subject, or which draw attention at a formal level to issues of practice or style, it shows how these poems speak for or against contemporary aesthetic doctrine, thereby revealing the extent of the poet's allegiance to it and the positions he takes up in the process of making his own mark in the literary field. In so doing it charts the development of a poet whose self-conscious engagement with his art offers an explanation as to why his work, in the space of little more than a decade and a half, should have been so singular and diverse. FEDERICO BONADDIO lectures in Modern Spanish Studies at King's College London.

cielo at domain: Lenition and Fortition Joaquim Brandão de Carvalho, Tobias Scheer, Philippe Ségéral, 2008-12-18 There are books on tone, coronals, the internal structure of segments, vowel harmony, and a couple of other topics in phonology. This book aims to fill the gap for Lenition and Fortition, which is one of the first phenomena that was addressed by phonologists in the 19th century, and ever since contributed to phonological thinking. It is certainly one of the core phenomena that is found in the phonology of natural language: together with assimilations, the other important family of phenomena, Lenition and Fortition constitute the heart of what phonology can do to sound. The book aims to provide an overall treatment of the question in its many aspects: historical, typological, synchronic, diachronic, empirical and theoretical. Various current approaches to phonology are represented. The book is structured into three parts: 1) properties and behaviour of Lenition/Fortition, 2) lenition patterns in particular languages and language families, 3) how Lenition/Fortition work. Part 1 describes the properties of lenition and fortition: what counts as such? What kind of behaviour is observed? Which factors bear on it (positional, stress-related)? Which role has it played in phonology since (and even before) the 19th century? The everything-you-always-wanted-to-know-about-lenition-and-fortition philosophy that guides the conception of the book supposes a descriptive, generalisation-oriented style of writing that relies on a kind of phonological lingua franca, rather than on theory-laden vocabulary. Also, no prior knowledge other than about general phonological categories should be required when reading through Part 1. The goal is to provide a broad picture of what lenition is, how it behaves, which factors it is conditioned by and what generalisations it obeys. This record may then be used as a yardstick for competing theories. Part 2 presents a number of case studies that show how Lenition/Fortition behave in a number of languages that include systems which are notoriously emblematic for Lenition/Fortition: Celtic, Western Romance, Germanic and Finnish. Finally, Part 3 is concerned with the analysis of the patterns that have been described in Parts 1 and 2. Given their analytic orientation, Part 3 chapters are theory-specific. They look at the same empirical record, or at a subset thereof, and try to explain what they see. Even though Part 3 chapters are couched in a specific theoretical environment that most of the time supposes prior conceptual knowledge, authors have been asked to assure theoretical interoperability as much as they could.

Rosalía de Castro (1837-85) wrote five volumes of poetry before succumbing to cancer of the uterus at the age of forty-eight. While she is perhaps best known for her more introspective and intimate poetry, Castro's mature works are also highly feminist and political in thematic orientation. This book examines the fascinating system of poetic techniques Castro employs in her works to link the compelling issues surrounding femaleness and identity- both national and individual- to the construction of a system of gendered symbolic language that has been vastly understudied by contemporary scholars.

cielo at domain: Isabel Allende's House of the Spirits Trilogy Karen Wooley Martin, 2010 The source of the narrative energy that creates such absorbing stories. Allende's very popular novels have attracted both critical approval and opprobrium, often at the expense of genuine analysis. This sophisticated study explores the narrative architecture of Allende's *House of the Spirits* [1982], *Daughter of Fortune* [1999], and *Portrait in Sepia* [2000] as a trilogy, proposing that the places created in these novels subvert the patriarchal norms that have governed politics, sexuality, and ethnicity. Rooted in the Foucauldian premise that the history of space is essentially the history of power, and supported by Susan Stanford Friedman's cultural geographies of encounter as well as Gloria Anzaldúa's study of borderlands, this study shows that, by rejecting traditional spatial hierarchies, Allende's trilogy systematically deterritorializes the elite while shifting the previously marginalized to the physical and thematic centers of her works. This movement provides the narrative energy which draws the reader into Allende's universe, and sustains the 'good story' for which she has been universally acclaimed. KAREN WOOLEY MARTIN is Associate Professor of Spanish at Union University, Jackson, Tennessee.

cielo at domain: Political Theology & Early Modernity Graham Hammill, Julia Reinhard Lupton, 2012-08-23 Political theology is a distinctly modern problem, one that takes shape in some of the most important theoretical writings of the twentieth and twenty-first centuries. But its origins stem from the early modern period, in medieval iconographies of sacred kinship and the critique of traditional sovereignty mounted by Hobbes and Spinoza. In this book, Graham Hammill and Julia Reinhard Lupton assemble established and emerging scholars in early modern studies to examine the role played by sixteenth- and seventeenth-century literature and thought in modern conceptions of political theology. *Political Theology and Early Modernity* explores texts by Shakespeare, Machiavelli, Milton, and others that have served as points of departure for such thinkers as Schmitt, Strauss, Benjamin, and Arendt. Written from a spectrum of positions ranging from renewed defenses of secularism to attempts to reconceive the religious character of collective life and literary experience, these essays probe moments of productive conflict, disavowal, and entanglement in

politics and religion as they pass between early modern and modern scenes of thought. This stimulating collection is the first to answer not only how Renaissance and baroque literature help explain the persistence of political theology in modernity and postmodernity, but also how the reemergence of political theology as an intellectual and political problem deepens our understanding of the early modern period.

cielo at domain: Into The Never Adam Steiner, 2020-03-01 Ushering in a new era of confessional music that spoke openly about experiences of trauma, depression, and self-loathing, Nine Inch Nails' seminal album, *The Downward Spiral*, changed popular music forever—bringing transgressive themes of heresy, S&M, and body horror to the masses and taking music technology to its limits. Released in 1994, the album resonated across a generation, combining elements of metal, industrial, synth-pop, and ambient electronica, and going on to sell over four million copies. Now, *Into the Never* explores the creation and cultural impact of *The Downward Spiral*, one of the most influential and artistically significant albums of the twentieth century. Inspired by David Bowie's *Low* and Pink Floyd's *The Wall*, the album recounts one man's disintegration as he descends into nihilism and nothingness. Blurring the lines between autobiography and concept album, creation and decay, it is also the story of Trent Reznor (who is Nine Inch Nails) as he pushed himself to the edge of the abyss, trapped in a cycle of addiction and self-destruction. *The Downward Spiral* also presents a reflection of America and a wider culture of violence, connecting the Columbine High School shooting, the infamous Manson family murders, and the aftermath of Vietnam and the Gulf War. Featuring new interviews with collaborators and artists inspired by the album, *Into the Never* sets *The Downward Spiral* in the context of music of the era and brings the story up to date, from Reznor's recovery to his reinvention as an Oscar-winning soundtrack artist.

cielo at domain: Speaking of Love: The Love Dialogue in Italian and French Renaissance Literature Reinier Leushuis, 2017-03-27 Re-evaluating the dialogue's place in the literary landscape of the Italian and French Renaissance, *Speaking of Love* presents the love dialogue at the intersection of a revival of the form and the period's philosophies of love and desire. Between 1540 and 1580, authors such as Speroni, Tullia d'Aragona, the Venetian poligrafi, Tyard, Le Caron, Pasquier, Taillemont, Marguerite de Navarre, and Louise Labé, feature interlocutors not only deliberating on love but imitating the experience of love in their dynamics of speaking. These love dialogues allow early modern ideologies and discourses of love to be imitated by the reader and rival lyric poetry in conveying amorous experience, validating dialogue as an authentic literary form rather than a tool of philosophical thinking.

At the same time, however, New Space technologies raise concerns for the right to privacy (the "Bad"), and face a number of challenges posed by hostile cyber operations (the "Ugly"). cielo at domain: Hispanic and Lusophone Voices of Africa Mongor-Lizarrabengoa, Sarita Naa Akuye Addy, 2022-09-06 Africa is usually depicted in Western media as a continent plagued by continuous wars, civil conflicts, disease, and human rights violations; however, an analysis of the region's cultural output reveals the depth and strength of the character of the African people that has endured the burden of colonialism. Undoubtedly, much of the scholarship on African literature

focuses on countries colonized by the British such as South Africa and Nigeria; however, the African nations colonized by Spain and Portugal have also made major literary contributions. This volume examines the literature and cinema of the African nations colonized by Spain and Portugal (Equatorial Guinea, Guinea-Bissau, Cabo Verde, Angola, Mozambique, and São Tomé and Príncipe) to demonstrate the complexity and heterogeneity of these countries in their attempts to establish a post-colonial identity. This volume is intended for undergraduate students, graduate students, and researchers seeking to study Hispanic and Luso-African literature and film, and so better understand cultural production in previously underrepresented nations of Africa.

cielo at domain: Quantum Poetics Daniel Albright, 1997-01-28 *Quantum Poetics* examines the way modernist poets appropriated scientific metaphors as part of a general search for the pre-verbal origins of poetry. Daniel Albright traces Modernism's search for the elementary particles from which poems were constructed. The poetic possibilities offered by developments in scientific discourse intrigued Yeats, Eliot and Pound, writers intent on remapping the general theory of poetry. Using models supplied by physicists, Yeats sought for the basic units of poetic force, both through his sequence *A Vision* and through his belief in, and defence of, the purity of symbols. Pound's whole critical vocabulary, Albright claims, aims at drawing art and science together in a search for poetic precision, the tiniest textual particles that held poems together. Through a series of patient and original readings, *Quantum Poetics* demonstrates how modernists created a whole new way of thinking about poetry and science as two different aspects of the same quest.

cielo at domain: Signal Processing and Pattern Recognition in Nondestructive Evaluation of Materials C.H. Chen, 2012-12-06 The NATO Advanced Research Workshop on Signal Processing and Pattern Recognition in Nondestructive Evaluation (NOE) of Materials was held August 19-22, 1987 at the Manoir St-Castin, Lac Beauport, Quebec, Canada. Modern signal processing, pattern recognition and artificial intelligence have been playing an increasingly important role in improving nondestructive evaluation and testing techniques. The cross fertilization of the two major areas can lead to major advances in NOE as well as presenting a new research area in signal processing. With this in mind, the Workshop provided a good review of progress and comparison of potential techniques, as well as constructive discussions and suggestions for effective use of modern signal processing to improve flaw detection, classification and prediction, as well as material characterization. This Proceedings volume includes most presentations given at the Workshop. This publication, like the meeting itself, is unique in the sense that it provides extensive interactions among the interrelated areas of NOE. The book starts with research advances on inverse problems and then covers different aspects of digital waveform processing in NOE and eddy current signal analysis. These are followed by four papers of pattern recognition and AI in NOE, and five papers of image processing and reconstruction in NOE. The last two papers deal with parameter estimation problems. Though the list of papers is not extensive, as the field of NOE signal processing is very new, the book has an excellent collection of both tutorial and research papers in this exciting new field.

cielo at domain: The Fictional World of Javier Marías Marta Pérez-Carbonell, 2016-06-21 *The Fictional World of Javier Marías* offers a fresh perspective on the narrative universe of one of Spain's most distinguished contemporary authors. In order to establish the origin and meaning of uncertainty in his fiction, this book presents interpretations of a range of issues inherent to Marías's canon, in particular those related to the nature of language. With the relationship between language and uncertainty at its heart, this study considers the use of foreign languages, translation, and the effect of silence through an analysis of: *Todas las almas* (1989), *Corazón tan blanco* (1992), *Mañana en la batalla piensa en mí* (1994) and *Tu rostro mañana* (2002-2007).

cielo at domain: The Last Charles Manson Tapes Dylan Howard, Andy Tillett, 2019-11-26

Fifty Years After the Sharon Tate/Labianca Murders, a New and Terrifying Investigation into the Modern Rebirth of Charles Manson's Killer Family Perhaps the most notorious American murderer of the twentieth century, Charles Manson's legacy extends far beyond his horrific crimes. As the wild-eyed, swastika-tattooed, nightmarishly charismatic leader of the Manson Family, he was convicted of the brutal killings of nine people in 1971 . . . including the Tate-LaBianca murders of seven in Los Angeles over two hot August nights in 1969. He spent the rest of his life in prison, and for the next fifty years preached his twisted philosophies from jail, attracting a whole new batch of freaks to his way of thinking. In *The Last Charles Manson Tapes*, authors Dylan Howard and Andy Tillet examine the Manson legacy. With brand new interviews with those closest to him, including Manson's heirs, friends and followers, experts and historians, and hours of exclusive transcripts of Manson's own manic preachings from his prison cell, you'll get to view a side of this serial killer few have ever seen. Manson's passing in 2017 has sparked into action a new generation of killer disciples, obsessed with the evil slaying spree he ordered and determined to carry on his "Helter Skelter" vision of an apocalyptic war. With the author's on-the-ground investigation, learn how the man once described as "the most dangerous man in America" may yet live up to that name.

cielo at domain: *Under the Blue Skies of Naples* Frank Palescandolo, 2001-07-18 Mark Vitelli, age 25, scion of a successful manufacturer of pizza: The Perfetto Pizza Company of Milwaukee, is deputized by his father to introduce the fast food pizza to Italy beginning in Naples. He is in charge of six huge refrigerated containers of pizza dough, and thousands of frozen individual pizza pie samples stowed in the refrigerated hold of a freighter whose direct port of call is Naples. On landing, Mark is greeted by Katerina Smith, a rep of the Wall Street underwriter of this enterprise. The proposal meets with violent opposition by two groups: The Anti-Blue Sky (anti cielo azzurro) movement that wishes to violently disassociate Naples from folklore kitsch and emblematic buffoonery of the pizza mystique. Their manifesto reads radically like that of the once Italian Futurists, the Anti-Blue Sky wish is to drag Naples into the 21st Century, an example: that the Sorrentine Peninsula be turned into a Silicon Valley, etc. Another group objecting is the Slow Food Movement against fast food emporiums, especially shoddy pizza palaces in the environs of Naples, and the cielo azzurro Pro-Blue Sky is championing the ancestral culture and charms of Naples. Mark, after many hilarious tries is blocked which leaves him footloose in Italy.

cielo at domain: *Reading Dante's Stars* Alison Cornish, 2000-01-01 Astronomy is one of the most prominent and perplexing features of Dante's *Divine Comedy*. In the final rhyme of the poem's three parts, and in scores of descriptions and analogies, the stars are an intermediate goal and a constant point of reference for the spiritual journey the poem narrates. This book makes a sustained analysis of Dante's use of astronomy, not only in terms of the precepts of medieval science but also in relation to specific moral, philosophical, and poetic problems laid out in each chapter. For Dante, Alison Cornish says, the stars offer optical representations of invisible realities, from divine providence to the workings of the human soul. Dante's often puzzling celestial figures call attention to the physical world as a scene of reading in which visible phenomena are subject to more than one explanation, Cornish contends. The poetry of Dante's astronomy, as well as its difficulty, rests on this imperative of interpretation. Reading the stars, like reading literature, is an ethical undertaking fraught with risk, not just an exercise in technical understanding. Cornish's book is the first guide to the astronomy of Dante's masterpiece to encompass both ways of reading his work.

cielo at domain: *The Descent* Jeff Long, 1999-11-12 We are not alone. Some call them devils or demons. But they are real. They are down there. And they are waiting for us to find them. In a cave in the Himalayas, a guide discovers a self-mutilated body with a warning: Satan exists. In the Kalahari Desert, a nun unearths evidence of a proto-human species and a deity called Older-than-Old. In Bosnia, something has been feeding upon the dead in a mass grave. So begins mankind's most shocking realization: the underworld is a vast geological labyrinth populated by another race of beings. With all of Hell's precious resources and territories to be won, a global race ensues. Nations, armies, religions, and industries rush to colonize and exploit the subterranean frontier. A scientific expedition is launched westward to explore beneath the Pacific Ocean floor,

both to catalog the riches there and to learn how life could develop in the sunless abyss. But in the dark underground, as humanity falls away from them, the scientists and mercenaries find themselves prey not only to the savage creatures, but also to their own treachery, mutiny, and greed. One thing is certain: Miles inside the earth, evil is very much alive.

cielo at domain: Nondestructive Evaluation of Materials by Infrared Thermography

Xavier P.V. Maldague, 2012-12-06 With national trade barriers falling, causing the expansion of the competitive global market, the question of quality control has become an essential issue for the 1990s. The time where the promise was to replace a product if it does not work seems to have passed; what is more important now is not so much a reduction in what is going wrong but an increase of what is going right the first time (Feigenbaum 1990). This new trend is sometimes referred to as total quality. Among the many advantages of this zero-defect manufacturing policy, we can enumerate (Laurin 1990): superior marketability of wholly dependable products, enormous gain in productivity, elimination of waste full cost in replacing poor quality work and retrofitting rejected products from the field. Although total quality is a relatively new and attractive concept for mass products such as cars, consumer electronics and personal computers, in many fields, mainly aerospace and military, it has been the rule for years because of security reasons.
