dmv org nevada: Organ Donation Institute of Medicine, Board on Health Sciences Policy, Committee on Increasing Rates of Organ Donation, 2006-09-24 Rates of organ donation lag far behind the increasing need. At the start of 2006, more than 90,000 people were waiting to receive a solid organ (kidney, liver, lung, pancreas, heart, or intestine). Organ Donation examines a wide range of proposals to increase organ donation, including policies that presume consent for donation as well as the use of financial incentives such as direct payments, coverage of funeral expenses, and charitable contributions. This book urges federal agencies, nonprofit groups, and others to boost opportunities for people to record their decisions to donate, strengthen efforts to educate the public about the benefits of organ donation, and continue to improve donation systems. Organ Donation also supports initiatives to increase donations from people whose deaths are the result of irreversible cardiac failure. This book emphasizes that all members of society have a stake in an adequate supply of organs for patients in need, because each individual is a potential recipient as well as a potential donor.

dmv org nevada: Debunked? Joseph Fried, 2022-12-12 Perhaps no issue in America has been more polarizing than the 2020 Presidential election. On one side there are claims of a "stolen" election, foreign infiltration of election equipment, middle-of-the-night ballot dumps, and impossible mathematical anomalies. On the other side, everything is dismissed as "baseless," "debunked," and "conspiratorial." This controversy goes directly to the integrity of our vote, a topic that should interest and concern us all. Yet despite the importance of this controversy, very little objective analysis is available, and there is a reason. Some people are afraid to touch this subject. A careless comment could cause the loss of friends, business, and even employment. Debunked? fearlessly fills this void—with facts. Written by a veteran auditor, it provides a reasoned, in-depth examination of the many controversies in the election, including: Dominion Voting Systems The "Kraken" lawsuits Missing signature standards Mike Lindell Drop boxes Cyber irregularities Mail-in ballots Ballot harvesting Illegal certifications Noncitizen voting Without a doubt, the most controversial section of the book is the detailed and quantified analysis of the election in each of 6 swing states: Arizona, Georgia, Michigan, Nevada, Pennsylvania, and Wisconsin. For each of those states, the decision to certify the election is given a thumbs up—or down. Conclusions are fully supported. The sanctity of our vote could easily be considered the key footing in the foundation of our democracy. But, given the extreme censorship of this subject, the public is largely unaware of the issues in this book. Reading it provides important insights into one of the key controversies of our age and should, perhaps, encourage us all to demand that our votes are considered sacrosanct.

dmv org nevada: Accelerating Democracy John O. McGinnis, 2013 How to adapt democracy to the accelerating pace of technological change—and why it's critical that we do Successful democracies throughout history—from ancient Athens to Britain on the cusp of the industrial age—have used the technology of their time to gather information for better governance. Our challenge is no different today, but it is more urgent because the accelerating pace of technological change creates potentially enormous dangers as well as benefits. Accelerating Democracy shows how to adapt democracy to new information technologies that can enhance political decision making and enable us to navigate the social rapids ahead. John O. McGinnis demonstrates how these new technologies combine to address a problem as old as democracy itself-how to help citizens better evaluate the consequences of their political choices. As society became more complex in the nineteenth century, social planning became a top-down enterprise delegated to experts and bureaucrats. Today, technology increasingly permits information to bubble up from below and filter through more dispersed and competitive sources. McGinnis explains how to use fast-evolving information technologies to more effectively analyze past public policy, bring unprecedented intensity of scrutiny to current policy proposals, and more accurately predict the results of future policy. But he argues that we can do so only if government keeps pace with technological change. For instance, it must revive federalism to permit different jurisdictions to test different policies so that their results can be evaluated, and it must legalize information markets to permit people to bet on what the consequences of a policy will be even before that policy is implemented. Accelerating Democracy reveals how we can achieve a democracy that is informed by expertise and social-scientific knowledge while shedding the arrogance and insularity of a technocracy.

dmv org nevada: The Integration of Driverless Vehicles in Commercial Carsharing Schemes in Germany: A Prefeasibility Study Daniel Kowalski, 2014-02-01 With an increasing world population and a steadily rising share of people living in urban areas, traffic density is on the rise, and has become a major issue of urban agglomerations all over the world. These trends are accompanied by the process of the motorization of the individual - with negative effects on both, the society and the individual. While millions of people get injured and die in traffic accidents each year, congestion causes mental stress and economic inefficiencies. Different solutions seek to tackle the problem like strengthening of public transport or encouraging residents to walk or make use of bicycles. However, they have yet failed to combine, for example, individual mobility needs and infrastructural conditions. In order to contribute to the debate of possible solutions, this study investigates the combination of two emerging concepts, carsharing and driverless vehicles. Germany was chosen as the basis of this study for its strong position in the car industry.

dmv org nevada: Unsettled Legal Issues Facing Automated Vehicles Ian Williams, 2020-02-28 This SAE EDGE Research Report explores the many legal issues raised by the advent of automated vehicles. While promised to bring major changes to our lives, there are significant legal challenges that have to be overcome before they can see widespread use. A century's worth of law and regulation were written with only human drivers in mind, meaning they have to be amended before machines can take the wheel. Everything from key federal safety regulations down to local parking laws will have to shift in the face of AVs. This report undertakes an examination of the AV laws of Nevada, California, Michigan, and Arizona, along with two failed federal AV bills, to better understand how lawmakers have approached the technology. States have traditionally regulated a great deal of what happens on the road, but does that still make sense in a world with AVs? Would the nascent AV industry be able to survive in a world with fifty potential sets of rules? Given the current lack of a federal AV law, state-level legislation can have a great deal of influence over the industry. Beyond government regulation, what other areas of our legal system will have to adapt to AVs? How do we assign liability for an accident in which the only actors were machines? How do you give an AV a ticket? The questions are numerous and have already captured the imagination of lawyers and lawmakers. This report will explore a number of potential changes facing the legal system, the unsettled aspects that derive from this new world, and the proposed solutions that have been raised. NOTE: SAE EDGE™ Research Reports are intended to identify and illuminate key issues in emerging, but still unsettled, technologies of interest to the mobility industry. The goal of SAE EDGE™ Research Reports is to stimulate discussion and work in the hope of promoting and speeding resolution of identified issues. SAE EDGE™ Research Reports are not intended to resolve the challenges they identify or close any topic to further scrutiny. dmv org nevada: Arabella Scott Walter, 2024-04-09 While billionaires like George Soros, Bill Gates, and Warren Buffett are well known as left-wing megadonors transforming the country's politics, few Americans know about Arabella Advisors, a "dark money" operation that channels much of this money into particular causes via pop-up groups designed to look like grassroots outfits. Citizens across the spectrum will be shocked to learn how Arabella's empire secretly operates using arrangements that produce the darkest of "dark money." Thanks to the author and his colleagues at Capital Research Center, which first exposed Arabella, even the mainstream press have begun to report on this scandalous story. As this book reveals, Arabella is a major player in battles over Supreme Court nominations, environmentalism, abortion, Medicare for All, fake local news outlets, "Rock Bucks" that manipulate election offices, lawsuits brought by Democratic super-lawyer (and Steele dossier booster) Marc Elias, and much more. The money is staggering. In the 2018 election cycle, Arabella's nonprofits took in \$1.2 billion, more than double the fundraising of the Democratic National Committee and the Republican National Committee combined. In the 2020 election cycle, Arabella's fundraising spiked to \$2.4 billion. This mountain of money explains why the left-leaning major media are alarmed. Arabella is "the indisputable heavyweight of Democratic dark money," writes the Atlantic. A "dark-money behemoth," says Politico. An "opaque network," says the New York Times, that funnels "hundreds of millions of dollars through a daisy chain of groups supporting Democrats and progressive causes."

Our nation has the potential to be an example of freedom and justice to the world and each of us has the ability to have tremendous impact. In this stirring call to arms, John Whitehead tells the stories of the local heroes who stood up to a cynical government, and who are creating thriving communities of change. We are on the cusp of a new era of progress, but we can't sit back and hope our elected officials will carry us there. We can join the people taking action at the local level, like the residents of a town in Oregon who protested unfair bills by paying in pennies, chickens and the shirts off their back. And we can follow the examples of the national heroes who are fighting for change and demanding accountability from our elected officials at the highest levels. If we refuse to listen to the cynics, we can join these everyday Americans, young and old, and harness our greatest resource: ourselves.
