### **future hearts minds and dreamers: Intimate Antipathies** Luke Carman, 2019-06-01

Intimate Antipathies is the much-anticipated new book by Luke Carman, the award-winning author of the cult classic *An Elegant Young Man*. The essays in this collection follow the writer in his oscillations through anxiety, outrage and ecstasy, and in the process explore the connections between writing and dreaming, writing and mental illness, writing and the complications of family life. From his famous jeremiad against arts administrators in 'Getting Square in a Jerking Circle', through the psychotic attack brought on by the collapse of his marriage, to his surreal account of meeting with Gerald Murnane at a golf club in the remote Victorian village of Goroke, Carman explores the particular challenges faced by writers who grow up in the contested borderlands of the

suburbs — always returning to his great obsession, the home on a small mountain in Sydney's west, where his antipathies with the real world first began to shape his imagination. Luke Carman's story collection *An Elegant Young Man* won the 2015 NSW Premier's New Writing Award and was shortlisted for the Australian Literature Society Gold Medal, the Steele Rudd Short Story Prize and the Readings New Writing Award. He was named a Sydney Morning Herald Best Young Novelist for the book, which is about a narrator, also named Luke, who bears many similarities to the essayist in this collection — an outspoken and self-mocking innocent who is beguiled by romance and yearns for transcendence.

Legend has it that during a township meeting in 1850, prominent German landowner Frederick Nerge put his fist down on the table and declared, *Schaumburg ichall et heiten!* meaning It will be called Schaumburg or literally Schaumburg it shall be. **future hearts minds and dreamers: Like Dreamers** Yossi Klein Halevi, 2013-10-01 "Powerful. . . beautifully written . . . There is much to admire . . . especially Mr. Halevi's skill at getting inside the hearts and minds of these seven men" —Ethan Bronner, New York Times Following the lives of seven young members from the 55th Paratroopers Reserve Brigade, the unit responsible for restoring Jewish sovereignty to Jerusalem during the 1967 Six Day War, acclaimed journalist Yossi Klein Halevi reveals how this band of brothers played pivotal roles in shaping Israel's destiny long after their historic victory. While they worked together to reunite their country in 1967, these men harbored drastically different visions for Israel's future. One emerges at the forefront of the religious settlement movement, while another is instrumental in the 2005 unilateral withdrawal from Gaza. One becomes a driving force in the growth of Israel's capitalist economy, while another ardently defends the socialist kibbutzim. One is a leading peace activist, while another helps create an anti-Zionist terror underground in Damascus. Featuring eight pages of black-and-white photos and maps, *Like Dreamers* is a nuanced, in-depth look at these diverse men and the conflicting beliefs that have helped to define modern Israel and the Middle East. "A beautifully written and sometimes heartbreaking account of these men, their families, and their nation." —Booklist, starred review "Halevi's book is executed with imagination, narrative drive, and, above all, deep empathy for a wide variety of Israelis, and the result is a must-read for anyone with an interest in contemporary Israel and the Israeli-Palestinian conflict. —Publishers Weekly, starred review "Mr. Halevi's masterly book brings us into [the] . . . debate and the lives of those who live it." —Elliott Abrams, Wall Street Journal

**future hearts minds and dreamers: U Dream, Inc.** Vlado Rahal Ph.D., 2023-01-04 Vlado Rahal, Ph.D., began his search for the meaning of life early on, asking himself questions like “Who am I?” As time went on, the need to find an answer took priority in his life. As a teenager, he felt that all the explanations he had been given were not sufficient to help him gain a contradiction-free understanding of existence. At age seventeen, he began studying physics and mathematics, believing back then that the most fundamental natural science should provide the answers he was seeking. He thought that if he understood general relativity, space, time, cosmology, and the big bang—and if he understood how the visible universe came into being and how it evolved—then he might be able to arrive at a better understanding of how we came into existence, how it all happened in the first place, and why. He went on to earn numerous degrees, including a Ph.D. in theoretical physics, and thought he found the answers he sought—and he embraced atheism. But when his atheist worldview could no longer be reconciled with what he was experiencing in life, he was left once again searching for answers. This book shares some of the insights he gleaned on his journey.

**future hearts minds and dreamers: Raven** Paul Marguglio, 2015-08-28 Being in love can take you to amazing heights, but when it ends it can drop you in a bottomless pit of gloom. Yet we live on, burying this desire to relive that last embrace, that last kiss, and in the quiet moments, we dream of a perfect love and close our eyes to sleep. This book of poetry spans roughly a fifty-five-year time period of experiences with love and relationships and reflecting the culture of the times and beliefs influenced by the silver screen and films such as Casablanca, Second Hand Lions, and many in between. Struggling with disillusioned certainty of forever-lasting love, it is finalized in a sphere of regrets and missed opportunity.

**future hearts minds and dreamers: Managing Science** Claude Gelès, Gilles Lindecker, Mel Month, Christian Roche, 2008-07-11 A unique how-to manual for the management of scientific laboratories This book presents a complete set of tools for the management of research and development laboratories and projects. With an emphasis on knowledge rather than profit as a measure of output and performance, the authors apply standard management principles and techniques to the needs of high-flux, open-ended, separately funded science and technology enterprises. They also propose the novel idea that failure, and incipient failure, is an important measure of an organization's potential. From the management of complex, round-the-clock, high-tech operations to strategies for long-term planning, Managing Science: Management for R&D Laboratories discusses how to build projects with the proper research and development, obtain and account for funding, and deal with rapidly changing technologies, facilities, and trends. The entire second part of the book is devoted to personnel issues and the impact of workplace behavior on the various functions of a knowledge-based organization. Drawing on four decades of involvement with the management of scientific laboratories, the authors thoroughly illustrate their philosophy with real-world examples from the physics field and provide tables and charts. Managers of scientific laboratories as well as scientists and engineers expecting to move into management will find Managing Science: Management for R&D Laboratories an invaluable practical guide.

**future hearts minds and dreamers: Inventing the Ties That Bind** Francesca Polletta, 2020-11-06 At a time of deep political divisions, leaders have called on ordinary Americans to talk to one another: to share their stories, listen empathetically, and focus on what they have in common, not what makes them different. In Inventing the Ties that Bind, Francesca Polletta questions this popular solution for healing our rifts. Talking the way that friends do is not the same as equality, she points out. And initiatives that bring strangers together for friendly dialogue may provide fleeting experiences of intimacy, but do not supply the enduring ties that solidarity requires. But Polletta also studies how Americans cooperate outside such initiatives, in social movements, churches, unions, government, and in their everyday lives. She shows that they often act on behalf of people they see as neighbors, not friends, as allies, not intimates, and people with whom they have an imagined relationship, not a real one. To repair our fractured civic landscape, she argues, we should draw on the rich language of solidarity that Americans already have.

**future hearts minds and dreamers: Almost All Aliens** Paul Spickard, Francisco Beltrán, Laura Hooton, 2022-09-15 Almost All Aliens offers a unique reinterpretation of immigration in the history of the United States. Setting aside the European migrant-centered melting-pot model of immigrant assimilation, Paul Spickard, Francisco Beltrán, and Laura Hooton put forward a fresh and provocative reconceptualization that embraces the multicultural, racialized, and colonially inflected reality of immigration that has always existed in the United States. Their astute study illustrates the

complex relationship between ethnic identity and race, slavery, and colonial expansion. Examining the lives of those who crossed the Atlantic, as well as those who crossed the Pacific, the Caribbean, and the North American Borderlands, *Almost All Aliens* provides a distinct, inclusive, and critical analysis of immigration, race, and identity in the United States from 1600 until the present. The second edition updates *Almost All Aliens* through the first two decades of the twenty-first century, recounting and analyzing the massive changes in immigration policy, the reception of immigrants, and immigrant experiences that whipsawed back and forth throughout the era. It includes a new final chapter that brings the story up to the present day. This book will appeal to students and researchers alike studying the history of immigration, race, and colonialism in the United States, as well as those interested in American identity, especially in the context of the early twenty-first century.

**future hearts minds and dreamers:** *Humanities for the Environment* Joni Adamson, Michael Davis, 2016-11-10 *Humanities for the Environment*, or HfE, is an ambitious project that from 2013-2015 was funded by a generous grant from the Andrew W. Mellon Foundation. The project networked universities and researchers internationally through a system of 'observatories'. This book collects the work of contributors networked through the North American, Asia-Pacific, and Australia-Pacific observatories. *Humanities for the Environment* showcases how humanists are working to 'integrate knowledges' from diverse cultures and ontologies and pilot new 'constellations of practice' that are moving beyond traditional contemplative or reflective outcomes (the book, the essay) towards solutions to the greatest social and environmental challenges of our time. With the still controversial concept of the 'Anthropocene' as a starting point for a widening conversation, contributors range across geographies, ecosystems, climates and weather regimes; moving from icy, melting Arctic landscapes to the bleaching Australian Great Barrier Reef, and from an urban pedagogical 'laboratory' in Phoenix, Arizona to Vatican City in Rome. Chapters explore the ways in which humanists, in collaboration with communities and disciplines across academia, are responding to warming oceans, disappearing islands, collapsing fisheries, evaporating reservoirs of water, exploding bushfires, and spreading radioactive contamination. This interdisciplinary work will be of great interest to scholars in the humanities, social sciences, and sciences interested in interdisciplinary questions of environment and culture.

**future hearts minds and dreamers:** *The Dream Thieves* AQEEL AHMED, 2024-04-07 *The Dream Thieves* Dream thieves steal people's aspirations until they encounter a dream so powerful, it

threatens the fabric of their reality. In Summary: In *The Dream Thieves*, the beautiful town of Aspira is shown to be a place where dreams are more than just scary images. This delicate balance is threatened by the Dream Thieves, mysterious beings from another world who eat dreams and disappear where happiness and creativity used to grow. In this case, Eli, a young resident of Aspira, is in the middle of a trip that will change his life. The Dream Thieves are interested in his visions because they are bright and full of healing and inspiration. This starts an epic story that will ultimately decide everyone's fate. As the story goes on, Eli's run-in with the Dream Thieves sets him on a mission to find out what dreams are really about and get back his stolen dreams. His journey shows how the dream and real worlds are complicatedly connected, and he has to find his way through a road full of danger, new discoveries, and the chance to meet new people. The Dream Thieves change from enemies to friends in the end because Eli keeps believing in the power of dreams and wants to make things right for everyone. Because they had hurt the Heart of Dreams, which is where all dream power in Aspira comes from, they set out to fix it. The most important part of the story is Eli's huge sacrifice: he gives up part of his own dream to save the dying Heart of Dreams. In both areas, it shows how powerfully personal dreams can affect the well-being of everyone. The Dream Thieves' future is changed by this brave and selfless act. Not only does it restore the flow of dreams, but it also forces them to become Protectors of Dreams, watching over the dream realm in case it is threatened again. The sad ending of *The Dream Thieves* is a bittersweet reminder of how dreams can bring about change, heal wounds, and bring people together. By following Eli's journey, readers are encouraged to think about how their own goals relate to reality and how they can work together to change it. Aspira wakes to a new era of peace and creativity. The story has a timeless lesson about how important it is to love and protect our dreams because they are the seeds from which amazing things can grow.

Chapter 1: The Amazing Dream of Eli. This was the first dream of its kind that Eli had ever had. Not only was he drawn to the city's beautiful textures and bright colors, but he was also drawn to the never-ending thrill and freedom he felt as he explored this amazing world. If you remember Eli's dream, he was on top of a cloud and looked down at a city that seemed to defy gravity. They were connected by bridges that looked like they were made of light and hung loosely in the air. They were made of bright materials that he wasn't sure what they were. There were buses and flying cars buzzing around him in the sky. They darted between buildings like fish in a river. The animals that roamed the city streets and sky, on the other hand, were what made this dream unique. These animals weren't like other animals; they talked to people like people, telling stories about their adventures and meeting people who came by. Eli remembers seeing a dog that could run faster than the flying cars and a cat whose wings sounded like old stories and whose laughter could be heard in the wind. When Eli woke up, his heart was still racing from an exciting dream. He lay in bed for a while, holding on to the dim memories of the city in the sky and the people who lived there. When Eli opened his eyes, he thought he might be back in the dream because it felt so real and solid. Eli felt he had to talk about what he had seen, even though the dream details were blurring and scenes from his own room were taking their place. He wasn't sure if his friends would believe him when he told them about the flying city and the talking animals, or if they would just think it was another dream. However, Eli knew that this dream was different. It didn't seem like something out of his mind; it was like a doorway into a world that was linked to his own in some way. The town of Aspira, where Eli lived, needed some magic. It had slowly lost its shine and life, and now there was a pall of darkness around it. It was hard for the people of Aspira to live happy lives because their daily lives were so boring and hard. The streets of town were not as busy as they used to be, and kids laughing wasn't heard very often. Eli had always thought that Aspira was missing something, something that could bring back the wonder and joy that had faded over time. While Eli thought about his dream, he began to wonder if Aspira needed a reminder of the magic in the world, the magic that could make the town happy again. Eli hurried to meet his friends because he was excited and wanted to tell them about his idea. His passionate story about his dream, which included detailed accounts of floating buildings, flying cars, and animals that talked, wowed his coworkers. They paid close attention as Eli told them about a world full of magic

and excitement. Aspira seemed to suddenly feel better as they sat together. The sadness that had been there seemed to lift, and a glimpse of hope and promise took its place. What Eli dreamed brought back the wonder and joy that his friends had lost for too long. They talked about their own dreams and told each other about strange animals and places they had seen in their sleep. They could believe in the impossible again after Eli's dream seemed to have opened a door. They thought that Eli's dream might not have been a dream at all as they talked. It could have been a challenge to them to find the magic in their own lives and bring it back to Aspira. In response to Eli's idea, they came up with a plan. Instead of in the sky, they were going to build their own flying city on Aspira. They would start with small projects like making models of flying structures and their own talking animals to bring some of Eli's ideas to life. Each project was meant to bring the wonder and happiness that Eli's dream had given them to as many people in the town as possible. It was their time to work when something amazing happened. Aspira's population grew because Eli and his friends were happy and interested. By stating their own goals and ideas, they added their knowledge and creativity to the movement that was already strong. The town slowly changed from being dead and boring to busy and creative. Paintings on the walls showed scenes from Eli's dream, and the talking animal statues in the town square made everyone happy. Eli's wonderful dream had started a movement in Aspira and given him a short break from real life. People in the town were told that magic isn't just in dreams, but also in the strength of groups and creativity. Aspira's streets went from being sad to being full of hope because of them. They brought Eli's skyscraper city to life. Eli realized that remembering what a place used to be is sometimes better than trying to change it. As the town began to come to life with the spirit of the dream, he realized this.

### Chapter 2: The Burglars in the Venereal Area

It was dark and strange in the peaceful town of Aspira, and something bad was going on. The Dream Thieves, a name for a group of mysterious and interesting people, walked quietly through the streets. They moved through the darkness with a grace that was both beautiful and scary. Their presence was almost ghostly, and you could feel it more than see it. These were not your average thieves; instead, they were looking for the most valuable and mysterious things in people. What they hoped for. They used ethereal nets and gadgets from an unknown world to record the dreams of the people who slept in Aspira. They were driven by need, not greed or spite. Dreams were more than just mental illusions for them; they were an important part of their world, like how air and water are for us. In the Dream Thieves' country, people's dreams became real. Over time, this fabric had started to fray and fall apart, which put their world's future at risk. To fix it, they needed dreams from people, full of color and feeling. The Dream Thieves waited for the Aspira people to go to sleep every night so they could steal their dreams, which rose up like smoke. These dreams ranged from normal to strange, from vivid memories of the previous day to trips into the future to places no one had been before. For the Dream Thieves, every dream was an important resource because it gave them energy to keep their world going for a little while longer. As they moved around Aspira, the Dream Thieves worked quickly but with respect for the dreams they stole. They knew how much the things they stole were worth and how their acts had hurt the people they borrowed from. But they were in great need, and the survival of their country was in danger. Aspira started to change a little with each dream that was written down. People in town felt like their mornings were missing something, but they couldn't put their finger on it. The intense dreams they had seemed to fade, leaving them with an unsettling feeling of emptiness and pain. They felt like something had cast a shadow over who they were, making them less inspired, happy, and living. Even though there was ethereal silence after the Dream Thieves' visits, people in Aspira were getting restless. They talked in whispers about their dying dreams, telling stories of lost adventures at night and strangely sad mornings. Some people started to wonder if the Dream Thieves stories, which had been written off as lies before, might actually be true. Could there really be beings that only lived in people's dreams, wiping out wonder and imagination in the process? The thought scared and interested the people in the town, who were all interested in the mysterious people who walked the streets at night. The bad guys in this story, though, were not the Dream Thieves. In their society, taking dreams was not a crime, that was okay. It was a heavy duty that was taken on in the

hopes that one day there would be no need to take from people, that their reality could be fixed, and that their worlds would be balanced again. They wished there was a way for everyone to live together and enjoy the beauty of dreams without putting anyone in danger or using up all their resources. During their nighttime walks, each dream they gathered had a whispered plea for peace, understanding, and a time when dreams can freely move between their world and the human world.

**future hearts minds and dreamers:** The Rule of 5 Paul Dupuis, 2020-10-26 Leadership and the E5 Movement CRACK THE CODE OF GAME-CHANGING LEADERSHIP From a young backpacker sleeping on a park bench in Japan to becoming a senior leader of one of the biggest corporate giants in the world, Paul Dupuis has built a career through game-changing leadership—crafted through his own experiences as an athlete, volunteer and CEO. The E5 formula discussed in The Rule of 5 is both familiar and fresh. It's a leadership model built in the spirit of 'standing on the shoulders of giants', learning from leaders like Konosuke Matsushita, the founder of Panasonic, who put 'empathy' and 'enable' at the core of his leadership approach; Jack Welch with his 3Es, who then inspired Bob McDonald at P&G to craft his own version of the 5Es; and Jim Collins, who shared his version of Level 5 Leadership in the book Good to Great with execution at the core. The E5 Movement is a call to action to all leaders worldwide to lead with impact. The five Es are: envision, express, excite, enable and execute. These five rules of leadership are both timeless and borderless. The real-life anecdotes, combined with the conversational tone of the book, make this an accessible and impactful read. Thought-provoking and practical, this book will inspire leaders to think about their own leadership, adopting the five Es on their mission to lead their teams to excellence—a true game changer. Pick your five and join the movement! PAUL DUPUIS is the CEO and chairman of Randstad Japan. Paul was formerly the CEO of Randstad India and chairman of HOPE International (JP). He is Canadian and bilingual; he speaks both English and Japanese, and has lived and worked across Asia for more than 25 years. He is an avid athlete, with a particular

passion for ice hockey and volunteering. "A wonderful guide for leading in tomorrow's rapidly changing world!" **future hearts minds and dreamers: Burn the Ice** Kevin Alexander, 2019-07-09

Inspiring—Danny Meyer, CEO, Union Square Hospitality Group; Founder, Shake Shack; and author, Setting the Table James Beard Award-winning food journalist Kevin Alexander traces an exhilarating golden age in American dining Over the past decade, Kevin Alexander saw American dining turned on its head. Starting in 2006, the food world underwent a transformation as the established gatekeepers of American culinary creativity in New York City and the Bay Area were forced to contend with Portland, Oregon. Its new, no-holds-barred, casual fine-dining style became a template for other cities, and a culinary revolution swept across America. Traditional ramen shops opened in Oklahoma City. Craft cocktail speakeasies appeared in Boise. Poke bowls sprung up in Omaha. Entire neighborhoods, like Williamsburg in Brooklyn, and cities like Austin, were suddenly unrecognizable to long-term residents, their names becoming shorthand for the so-called hipster movement. At the same time, new media companies such as Eater and Serious Eats launched to chronicle and cater to this developing scene, transforming nascent star chefs into proper celebrities. Emerging culinary television hosts like Anthony Bourdain inspired a generation to use food as the lens for different cultures. It seemed, for a moment, like a glorious belle époque of eating and drinking in America. And then it was over. To tell this story, Alexander journeys through the travails and triumphs of a number of key chefs, bartenders, and activists, as well as restaurants and neighborhoods whose fortunes were made during this veritable gold rush—including Gabriel Rucker, an originator of the 2006 Portland restaurant scene; Tom Colicchio of Gramercy Tavern and Top Chef fame; as well as hugely influential figures, such as André Prince Jeffries of Prince's Hot Chicken Shack in Nashville; and Carolina barbecue pitmaster Rodney Scott. He writes with rare energy, telling a distinctly American story, at once timeless and cutting-edge, about unbridled creativity and ravenous ambition. To burn the ice means to melt down whatever remains in a kitchen's ice machine at the end of the night. Or, at the bar, to melt the ice if someone has broken a glass in the well. It is both an end and a beginning. It is the firsthand story of a revolution in how Americans eat and drink.

Fernando Torres-Gil, PhD, Jacqueline L. Angel, PhD, 2018-08-28 As the twin demographic shifts of population aging and diversity speed forward in America, it is hard to imagine a timelier or more needed work. - Paul Irving, Chairman, Milken Institute Center for the Future of Aging This timely and critical book takes on a new phenomenon facing the United States and poses the stark question: Will the United States be prepared by 2050, when its older population doubles and we become a majority-minority society? In the authors' response, scholars, policy leaders and the public are provided with the background and information that connects these two trends to contemporary public policy debates. Written with clarity and expertise, this book illuminates the changes and challenges that face the nation by concisely addressing a wide range of topics, including immigration reform, the politics of aging, and health and retirement security, and provides a glimpse of how the "next America" might look. With case studies and real-world examples, the book outlines and analyzes the possible impact of this phenomenon on issues like governance, public benefits, the long term care work force and national security, and builds a broader framework with which to understand them. With combined experience in academia, government and policy advocacy, the authors tackle the dramatic changes occurring across the United States and offer a road map to not only understanding but addressing these challenges and opportunities with reason and responsibility. **future hearts minds and dreamers: Peace** Becky Thompson, 2020-09-08 The bestselling author of *Love Unending* and *Midnight Mom* Devotional reassures anxious women that even if you can't shake off fear, your faith is not broken. For years, Christian women have been told, If you just prayed more, had more faith, and trusted Jesus, you'd have more peace. But what does it mean when a Christian momma continues to worry? How does she reconcile her feelings of fear with her faith in God? And how does she raise her children in a home full of peace when she feels anything but peaceful? Becky Thompson, a best-selling author with a degree in biblical studies, knows firsthand what it is like to suffer from the crippling effects of anxiety--a condition she has struggled to overcome for most of her life. For her and many others, the fear she faces is not a faith issue. It's a physical one that affects over 40 million adults in the US. As Becky examines the relationship between the promise of peace in Scripture and the reality of life, motherhood, and anxiety, she brings both a practical and spiritual approach to the discussion of anxiety and how it impacts your mind, body, and spirit. *Peace* meets moms in the forest of fear where they have felt isolated and alone and walks them toward hope, reminding them that there are millions of other women who walk the same dark, uncertain trails they do and there isn't something wrong with their faith because they can't shake the fear. *Peace* is a lifeline for the Christian mom desperate for solid advice based on sound doctrine and presented in a way that makes her feel understood and far less alone on her journey toward healing.
